this undergraduate textbook on the physics of wave motion in optics and acoustics avoids presenting the topic abstractly in order to emphasize real world examples while providing the needed scientific context dr espinoza also relies on students own experience to guide their learning the book s exercises and labs strongly emphasize this inquiry based approach a strength of inquiry based courses is that the students maintain a higher level of engagement when they are studying a topic that they have an internal motivation to know rather than solely following the directives of a professor wave motion takes those threads of engagement and interest and weaves them into a coherent picture of wave phenomena it demystifies key components of life around us in music in technology and indeed in everything we perceive even for those without a strong math background who might otherwise have trouble approaching the subject matter

science is unique among the disciplines since it is inherently hands on however the hands on nature of science instruction also makes it uniquely challenging when teaching in virtual environments how do we as science teachers deliver high quality experiences to secondary students in an online environment that leads to age grade level appropriate science content knowledge and literacy but also collaborative experiences in the inquiry process and the nature of science the expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning killham et al 2014 wong et al 2018 prek 12 teachers consistently report feeling underprepared or overwhelmed by online learning environments molnar et al 2021 seaman et al 2018 this is coupled with persistent challenges related to elementary teachers lack of confidence and low science teaching self efficacy brigido borrachero bermejo mellado 2013 gunning mensah 2011 teaching and learning online science for secondary grade levels comprises three distinct sections frameworks teacher s journeys and lesson plans each section explores the current trends and the unique challenges facing secondary teachers and students when teaching and learning science in online environments all three sections include alignment with next generation science standards tips and advice from the authors online resources and discussion questions to foster individual reflection as well as small group classwide discussion teacher s journeys and lesson plan sections use the 5e model bybee et al 2006 duran duran 2004 ideal for undergraduate teacher candidates graduate students teacher educators classroom teachers parents and administrators this book addresses why and how teachers use online environments to teach science content and work with elementary

students through a research based foundation

this book offers the latest research and new perspectives on interactive collaborative learning and engineering pedagogy we are currently witnessing a significant transformation in education and in order to face today's real world challenges higher education has to find innovative ways to quickly respond to these new needs addressing these aspects was the chief aim of the 21st international conference on interactive collaborative learning icl2018 which was held on kos island greece from september 25 to 28 2018 since being founded in 1998 the conference has been devoted to new approaches in learning with a special focus on collaborative learning today the icl conferences offer a forum for exchanging information on relevant trends and research results as well as sharing practical experiences in learning and engineering pedagogy this book includes papers in the fields of collaborative learning computer aided language learning call educational virtual environments engineering pedagogy education game based learning k 12 and pre college programs mobile learning environments applications it will benefit a broad readership including policymakers educators researchers in pedagogy and learning theory school teachers the learning industry further education lecturers etc
