telling an american horror story collects essays from new and established critics looking at the many ways the horror anthology series intersects with and comments on contemporary american social political and popular culture divided into three sections the chapters apply a cultural criticism framework to examine how the first eight seasons of abs engage with american history our contemporary ideologies and social policies part i explores the historical context and the uniquely american folklore that abs evokes from the southern gothic themes of coven to connections between apocalypse and anxieties of modern american youth part ii contains interpretations of place and setting that mark the various seasons of the anthology finally part iii examines how the series confronts notions of individual and social identity like the portrayals of destructive leadership in cult and lesbian representation in asylum and hotel

nearly a decade ago a general review article on the evaluation of optical radiation hazards was published in applied optics sliney and freasier 1973 this article received many favorable comments but also prompted many inquiries regarding specific optical hazard problems from this it became evident that a monograph rather than a supplemental and expanded article was needed to fill this literature gap relating to laser and optical radiation hazards the present work is designed to fill that gap and is structured to permit either classroom or self study use much of the material in this book was developed in connection with short courses on laser safety and radiometry in which we have participated as well as from our previous articles in particular the sequence of chapters is based upon the experiences which we have had in lecturing in courses with different schedules one of the great difficulties in developing a text of this nature is that a broad multidisciplinary background must be included in order that the reader can comprehend all of the subject matter readily for this reason the material presented on anatomy and physiology is oriented toward the engineer or physical scientist while the review material on basic optical physics is intended more for the physician or life scientist

chronicles the history of some of the nation's most famed hunters from daniel boone and davy crockett to kit carson and teddy roosevelt

this edited collection assesses the complex historical and contemporary relationships between us and australian cinema by tapping directly into discussions of national cinema transnationalism and global hollywood while most equivalent studies aim to define national cinema as independent from or in competition with hollywood this collection explores a more porous set of relationships through the varied production distribution and exhibition associations between australia and the us to explore this idea the book investigates the influence that australia has had on us cinema through the exportation of its stars directors and other production personnel to hollywood while also charting the sustained influence of us cinema on australia over the last hundred years it takes two key points in time the 1920s and 1930s and the last twenty years to explore how particular patterns of localism nationalism colonialism transnationalism and globalisation have shaped its course over the last century the contributors re examine the concept and definition of australian cinema in regard to a range of local international and global practices and trends that blur neat categorisations of national cinema although this concentration on us production or influence is particularly acute in relation to developments such as the opening of international film studios in melbourne sydney adelaide and the gold coast over the last thirty years the book also examines a range of hollywood financed and or conceived films shot in australia since the 1920s
