runways and racers concentrates on the short transitional period 1952 1954 for sports car racing in america following the ban on public road racing in many of the states the ban left the rapidly expanding sports car club of america with a problem where to hold races at precisely the same time curtis lemay head of strategic air command was having problems obtaining funds from congress to improve conditions on the many air bases located around the country the solution was a marriage of convenience whereby the scca was allowed access to active sac air bases to hold its race programmes in return the sac base would receive the net profits from the event which would be put into the airmen s living improvement fund as a result of some initial financial success for the sac bases the scheme was also adopted by non sac bases together with regional clubs with the same agreement in place complaints from airmen alerted congressman errett scrivner to potential irregularities and he ordered an audit to be conducted to ascertain precisely what it was costing the air bases to host the races his findings led to the cessation of the races ordered by congress the product of a long period of extensive research by the author this book gives a fascinating insight into this two year period complemented by over 150 period pictures many previously unpublished

the wedge shaped v12 lamborghini flagships were always spectacular in shape sound and performance the murcielago was an evolution of the countach and the diablo and was as iconic in its time as its illustrious predecessors were in theirs this book examines the murcielago in detail while casting a look back through lamborghini s troubled history to understand how the murcielago came into being ferruccio lamborghini

patrick minram megatech chrysler and finally vw audi all played their part in the birth of this modern classic the book touches on the people and organisations involved in the production of this iconic car before examining each of the model variants and discusses the joys and tribulations of ownership

the growth of sports car racing in northeast america was not painless tragedy mystery subterfuge intrigue and an adherence to a particular club philosophy all featured in its story during the 1950s when professionalism in the sport was always bubbling under the surface the northeast area of america has long been considered the cradle of post world war ii sports car racing the sports car club of america was founded there and it was the entry point to america for a host of european sports cars early in the 1950s road races had been permitted by some state authorities but due to fatal accidents a ban on such racing came into effect forced to find alternative venues the motor clubs were attracted to civil airports and a few military bases but the drivers craved more challenging venues on which to hone their skills this resulted in a few individuals chancing their reputation and a great deal of money and opening purpose built circuits this book gives a unique insight into this intriguing journey through the decade extensively researched the compelling story and stunning contemporary photos many previously unpublished paint a fascinating portrait of a nascent sport coming into its own

paul n macdonald has assembled a collection of powerful molecular tools for examining and characterizing protein protein protein dna and protein rna interactions the techniques range from the most basic introducing plasmids into yeasts interaction assays and recovering the plasmids from yeast to the most advanced alternative strategies involving one hybrid split two hybrid three hybrid membrane recruitment systems and mammalian systems methods are also provided for dealing with the well known problem of artifacts and false positives and for identifying the interacting partners in important biological systems including the smad and nuclear receptor pathways to ensure ready reproducibility and robust results each technique is described in step by step detail by researchers who employ it regularly

written by outstanding authorities from all over the world this comprehensive new textbook on pediatric and neonatal ventilation puts the focus on the effective delivery of

respiratory support to children infants and newborns in the early chapters developmental issues concerning the respiratory system are considered physiological and mechanical principles are introduced and airway management and conventional and alternative ventilation techniques are discussed thereafter the rational use of mechanical ventilation in various pediatric and neonatal pathologies is explained with the emphasis on a practical step by step approach respiratory monitoring and safety issues in ventilated patients are considered in detail and many other topics of interest to the bedside clinician are covered including the ethics of withdrawal of respiratory support and educational issues throughout the text is complemented by numerous illustrations and key information is clearly summarized in tables and lists
