the publication focuses on pre service teachers beliefs as the key prerequisite for teaching mathematics this construct is considered an inseparable part of the teacher s personality which needs to be positively shaped during undergraduate training the theoretical part shows its correlation with other psychological determinants such as motivation perceived self efficacy or attitudes the construct is also placed in an educational context the empirical part describes the results of the research and provides specific suggestions for undergraduate teacher training

the enigmatic relation between religion and science still presents a challenge to european societies and to ideas about what it means to be modern this book argues that european secularism rather than pushing back religious truth claims in fact has been religiously productive itself the institutional establishment of new disciplines in the nineteenth century such as religious studies anthropology psychology classical studies and the study of various religious traditions led to a professionalization of knowledge about religion that in turn attributed new meanings to religion this attribution of meaning resulted in the emergence of new religious identities and practices in a dynamic

that is closely linked to this discursive change the natural sciences adopted religious and metaphysical claims and integrated them in their framework of meaning resulting in a special form of scientific religiosity that has gained much influence in the twentieth century applying methods that come from historical discourse analysis the book demonstrates that religious semantics have been reconfigured in the secular sciences ultimately the scientification of religion perpetuated religious truth claims under conditions of secularism
