the investigation of computational models of argument is a rich and fascinating interdisciplinary research field with two ultimate aims the theoretical goal of understanding argumentation as a cognitive phenomenon by modeling it in computer programs and the practical goal of supporting the development of computer based systems able to engage in argumentation related activities with human users or among themselves the biennial international conferences on computational models of argument comma provide a dedicated forum for the presentation and discussion of the latest advancements in the field and cover both basic research and innovative applications this book presents the proceedings of comma 2020 due to the covid 19 pandemic comma 2020 was held as an online event on the originally scheduled dates of 8 11 september 2020 organised by the university of perugia italy the book includes 28 full papers and 13 short papers selected from a total of 78 submissions the abstracts of

3 invited talks and 13 demonstration abstracts the interdisciplinary nature of the field is reflected and contributions cover both theory and practice theoretical contributions include new formal models the study of formal or computational properties of models designs for implemented systems and experimental research practical papers include applications to medicine law and criminal investigation chatbots and online product reviews the argument mining trend from previous comma s is continued while an emerging trend this year is the use of argumentation for explainable ai the book provided an overview of the latest work on computational models of argument and will be of interest to all those working in the field

argumentation is often understood as a coherent set of western theories birthed in athens and developing throughout the roman period the middle ages the enlightenment and renaissance and into the present century ideas have been nuanced developed and revised but still the outline of argumentation theory has been recognizable for centuries or so it has seemed to western scholars the 2019 alta conference on argumentation co sponsored by the national communication association and the american forensic association aimed to question the generality of these intellectual traditions this resulting collection of essays deals with the possibility of having local theories of argument local to a particular time a particular kind of issue a particular place or a particular culture many of the papers argue for reconsidering basic ideas about arguing to represent the uniqueness of some moment or location of discourse other scholars are more comfortable with the western traditions and find them congenial to the analysis of arguments that originate in discernibly distinct circumstances the papers represent different methodologies cover the experiences of different nations at different times examine varying sorts of argumentative events speeches court decisions food choices and sound explore particular personal identities and the issues highlighted by them and have different overall orientations to doing argumentation scholarship considered together the essays do not generate one simple conclusion but they stimulate reflection about the particularity or generality of the experience of arguing and therefore the scope of our theories
