topical themes in argumentation theory brings together twenty exploratory studies on important subjects of research in  
contemporary argumentation theory the essays are based on papers that were presented at the 7th conference of the  
international society for the study of argumentation issa in amsterdam in june 2010 they give an impression of the nature and  
the variety of the kind of research that has recently been carried out in the study of argumentation the volume starts with three  
essays that provide stimulating theoretical perspectives on argumentation subsequently some views are explained on the intriguing  
topics of dissensus and deep disagreement after a discussion of three different approaches to the treatment of types of  
argumentation some classical themes from antique argumentation theory are revisited the new research area of visual  
argumentation is explored in the next part the volume concludes with three reports of experimental studies concerning  
argumentative discourse the volume starts with three essays that provide stimulating theoretical perspectives on argumentation

argumentation is often understood as a coherent set of western theories birthed in athens and developing throughout the roman period the middle ages the enlightenment and renaissance and into the present century ideas have been nuanced developed and revised but still the outline of argumentation theory has been recognizable for centuries or so it has seemed to western scholars the 2019 alta conference on argumentation co sponsored by the national communication association and the american forensic association aimed to question the generality of these intellectual traditions this resulting collection of essays deals with the possibility of having local theories of argument local to a particular time a particular kind of issue a particular place or a particular culture many of the papers argue for reconsidering basic ideas about arguing to represent the uniqueness of some moment or location of discourse other scholars are more comfortable with the western traditions and find them congenial to the analysis of arguments that originate in discernibly distinct circumstances the papers represent different methodologies cover the experiences of different nations at different times examine varying sorts of argumentative events speeches court decisions food choices and sound explore particular personal identities and the issues highlighted by them and have different overall orientations to doing argumentation scholarship considered together the essays do not generate one simple conclusion but they stimulate

reflection about the particularity or generality of the experience of arguing and therefore the scope of our theories

the investigation of computational models of argument is a rich and fascinating interdisciplinary research field with two ultimate aims the theoretical goal of understanding argumentation as a cognitive phenomenon by modeling it in computer programs and the practical goal of supporting the development of computer based systems able to engage in argumentation related activities with human users or among themselves the biennial international conferences on computational models of argument comma provide a dedicated forum for the presentation and discussion of the latest advancements in the field and cover both basic research and innovative applications this book presents the proceedings of comma 2020 due to the covid 19 pandemic comma 2020 was held as an online event on the originally scheduled dates of 8 11 september 2020 organised by the university of perugia italy the book includes 28 full papers and 13 short papers selected from a total of 78 submissions the abstracts of 3 invited talks and 13 demonstration abstracts the interdisciplinary nature of the field is reflected and contributions cover both theory and practice theoretical contributions include new formal models the study of formal or computational properties of models designs for implemented systems and experimental research practical papers include applications to medicine law and criminal investigation chatbots and online product reviews the argument mining trend from previous comma s is continued while an emerging trend this year is the use of argumentation for explainable ai the book provided an overview of the latest work on computational models of argument and will be of interest to all those working in the field

junior high aged students will argue and sometimes quarrel but they won t argue well without good training young teens are also targeted by advertisers with a vengeance from billboards to commercials to a walk down the mall fallacious arguments are everywhere you look the art of argument was designed to teach the argumentative adolescent how to reason with clarity relevance and purpose at a time when he has a penchant for the why and how it is designed to equip and sharpen young

minds as they live play and grow in this highly commercial culture this course teaches students to recognize and identify twenty eight informal fallacies and the eye catching text includes over sixty slick and clever phony advertisements for items from blue jeans to pick up trucks which apply the fallacies to a myriad of real life situations
