robert eugene marshak 1916 92 devoted much of his life to helping other people carry out scientific research and gather to discuss their work in addition to his scientific statesmanship he was an extraordinarily gifted research scientist and many of his scientific contributions have been prophetic this book pays homage to his creativity and continuing work with contributions from many of the people whose lives have been influenced by him

organophosphorus chemistry provides a comprehensive annual review of the literature coverage includes phosphines and their chalcogenides phosphonium salts low coordination number phosphorus compounds penta and hexa coordinated compounds tervalent phosphorus acids nucleotides and nucleic acids ylides and related compounds and phosphazenes the series will be of value to research workers in universities government and industrial research organisations whose work involves the use of organophosphorus compounds it provides a concise but comprehensive survey of a vast field of study with a wide variety of applications enabling the reader to rapidly keep abreast of the latest developments in their specialist areas specialist periodical reports provide systematic and detailed review coverage of progress in the major areas of chemical research written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry for over 80 years the royal society of chemistry and its predecessor the chemical society have been publishing reports charting developments in chemistry which originally took the form of annual reports however by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series specialist periodical reports was born the annual reports themselves still existed but were divided into two and subsequently three volumes covering inorganic organic and physical chemistry for more general coverage of the highlights in chemistry they remain a must since

that time the spr series has altered according to the fluctuating degree of activity in various fields of chemistry some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued the current list of specialist periodical reports can be seen on the inside flap of this volume

a concise but comprehensive annual survey of a vast field of study enabling the reader to rapidly keep abreast of the latest developments in this specialist area
