health and fitness apps collect various personal information including name email address age height weight and in some cases detailed health information when using these apps many users trustfully log everything from diet to sleep patterns however by sharing such personal information end users may make themselves targets to misuse of this information by unknown third parties such as insurance companies despite the important role of informed consent in the creation of health and fitness applications the intersection of ethics and information sharing is understudied and is an often ignored topic during the creation of mobile applications privacy concerns surrounding personal information sharing on health and fitness mobile apps is a key reference source that provides research on the dangers of sharing personal information on health and wellness apps as well as how such information can be used by employers insurance companies advertisers and other third parties while highlighting topics such as data ethics privacy management and information sharing this publication explores the intersection of ethics and privacy using various quantitative qualitative and critical analytic approaches it is ideally designed for policymakers software developers mobile app designers legal specialists privacy analysts data scientists researchers academicians and upper level students

health psychology is an offer of help an effort to understand how biological behavioral and social factors influence health and illness as one of the fast growing sub specialties it has now outstripped other divisions of psychology in terms of excitement in the public eye and yet a new occupation was built on somewhat unrealistic idealized assumptions the title of this book was therefore chosen to emphasize the fact that an extensive critique of those assumptions is essential this book proposes arbitrary boundaries for a discourse on health psychology the array of subjects is based on two major themes the foundation of health psychology and the range of disorders where psychological knowledge might benefit the sick and the question of whether or not health psychology has a systematic and pragmatic structure so as to qualify as a profession

globally a shift in population structures and disease spectrum is inevitable the latest global burden of disease study revealed that the average healthy life expectancy has steadily increased from 1990 to 2019 worldwide however there

is a concerning trend in which the growth in healthy life expectancy is lower than the growth in life expectancy in 198 out of 204 countries evaluated this implies that people spend more time in sub optimal health despite living longer moreover non communicable diseases contribute an increasingly significant portion of the disease burden in low and middle income countries growing from one third to almost two thirds from 1990 to 2019 this mainly results from preventable risk factors it is important to approach aging with a positive outlook this entails guaranteeing sufficient medical care and proactively managing health issues in older adults importantly since several diseases are often irreversible prevention is key social and psychological factors due to their nebulous harm have struggled to gain attention over a long period we should aim to make the additional years gained during old age as healthful as those in other life stages
