this book provides an overview of the range of applications of induction heating with methods by which conventional as well as special heating jobs can be designed around the capabilities of the process

the second edition of the handbook of induction heating reflects the number of substantial advances that have taken place over the last decade in theory computer modeling semi conductor power supplies and process technology of induction heating and induction heat treating this edition continues to be a synthesis of information discoveries and technical insights that have been accumulated at inductoheat inc at industry and academia

based on the remarkable discoveries of the fathers of electromagnetism induction heating and melting became one of the most advanced methods of material production modification and manufacturing industries that intensively use induction heating include steel automotive machinery aerospace electronics crystal growth and some others new applications are emerging in food and packaging industries and even in medicine but who invented induction heating and when did it happen various significant developments and methods that played a big role in induction technique are almost forgotten or at least not known to modern engineers knowledge of the experience of the previous generations especially of the works of the pioneers can reveal many interesting ideas which were abandoned at that time but could be practical today with more advanced materials components and technologies knowledge of successes and failures of others will help to avoid mistakes and foresee future ways of induction technology expansion the goal of this book is not to give an accurate chronological list of main events and achievements but to show dynamics of technology and illustrate it with examples multiple pictures and references in july 2006 the world induction community lost one of its most distinguished members professor alfred m hlbauer outstanding scientist engineer teacher and relentless promoter of induction technology this book

is his last imposing and great project which was completed by his colleagues and friends
