pulsation in architecture highlights the paradigm shift in spatial perception due to the intense use of computational techniques and the ability to morph massive amounts of data into spatial patterns this highly illustrative survey includes kipnis eisenman lynn unstudio and others

pulsation in architecture highlights the role of digital design as the catalyst for a new spatial sensibility related to rhythmic perception it proposes a novel critical reception of computational architecture based on the ability of digital design to move beyond mere instrumentality and to engage with core aspects of the discipline the generative engine of digital architecture reinvigorates a discourse of part to whole relationships through the lens of rhythmic affect there is a paradigm shift in spatial perception due to the intense use of computational techniques and the capacity to morph massive amounts of data in spatial patterns rhythm plays a pivotal role in the articulation of the topology of buildings generating the atmospheric character that induces moods and throbbing sensations in space pulsation introduces the fundamental animate capacity of living form and reshapes our perception of architectural space across the multiple scales of a project from digital inception to fabrication an emerging thread of rhythmic sensibility loosely binds a survey of contemporary design practices including contributions by peter eisenman jeff kipnis greg lynn unstudio preston scott cohen reiser umemoto asymptote ali rahim hernan diaz alonso ruy klein gage clemenceau nox evan douglis studio kokkugia and monad studio

architectural exaptation when function follows form focuses on the significance and the originality of the study of exaptation it presents exaptation as an opportunity to extend architectural design towards more sustainable approaches aimed at enforcing urban resilience the use of exaptation s definition in architecture supports the heuristic value of cross disciplinary studies on biology and architecture which seem even more relevant in times of global environmental crises this book aims to make a critique of the pre existing and extensive paternalistic literature exaptation will be described as a functional shift of a structure that already had a prior but different function in architecture a functional shift of a structure that already had a function may apply to forms of decorative elements embedded in architectural components and to both change of function of tectonic elements and the change of use of an architectural space the book is illustrated with examples from around the globe including china italy mexico new zealand the usa and the uk and looks at different civilizations and diverse historical periods ranging from the urban to the architectural scale such examples highlight the potential and latent human creative capacity to change the use and functions something that cities and buildings could consider when facing disturbances exaptation is shown as an alternative narrative to the simplifications of evolutionary puritanism it also offers an innovative perspective and presents an opportunity to re think the manner in which we design and redesign our cities this book will be of interest to architecture planning urban design and biology researchers and students winner of the gerd albers award 2024 this award is for the best book contribution in the field of urban planning and is awarded by international society of city and regional planners isocarp

this book presents selected papers from international conference on intelligent and efficient electrical systems iciees 17 the volume brings together content from both industry and academia the book focuses on energy efficiency in electrical systems and covers en trende topics such as control of renewable energy systems the collaborative industry academia

perspective of the conference ensures that equal emphasis is laid on novel topics and practical applications the contents of this volume will prove useful to researchers and practicing engineers alike
