includes pictures includes excerpts of contemporary accounts about the dodo includes a bibliography for further reading the dodo never had a chance he seems to have

been invented for the sole purpose of becoming extinct and that was all he was good for willy cuppy 19th century american humorist and literary critic at one point or another just about everyone has heard of the dodo bird which is almost universally described as a cuddly whimsical creature renowned for its alleged stupidity this prehistoric avian had been known for hundreds of years before it was made popular around the world in lewis carroll s 1865 classic alice s adventures in wonderland the character the dodo satirized the author himself according to pop culture lore carroll whose real name was charles lutwidge dodgson regarded the dodo as his spirit animal due to his alleged stutter which led to him often presenting himself as do do dodgson carroll was also a frequent patron of the oxford museum of natural history which served as a fount of inspiration for his memorable anthropomorphic characters the 1951 disney animation alice in wonderland breathed new life into carroll s dodo portrayed as a plump peach faced creature with a bulbous pink beak clad in a purple waistcoat a powdered wig and a pipe dangling out of his beak like its real life counterparts the dodo was depicted as a flightless bird who crossed paths with alice bobbing along inside of a bottle upon the open sea owing to its inability to fly the dodo uses an upside down toucan as his boat and the dodo is being maneuvered by a green hawk furiously flapping its wings serving as the boat s propeller the dimwitted carefree dodo also made various appearances in film and tv shows over the years such as yoyo dodo in the 1938 black and white animation porky in wackyland the short lived stop motion animated series rocky and the dodos and the 2002 animated film ice age which depicts the dodos as a silly clumsy troop of birds who fail to guard three small watermelons indeed the dodo s presence in literature picture books music video games and general pop culture has been so prevalent that it has secured its own entry on tv tropes where it is infamously immortalized as the dumb dodo this only scratches the surface of the string of misconceptions that has plagued the delightfully peculiar bird for centuries along with its stereotypical depictions in literature film and other mediums of pop culture a number of idioms playing on the bird s alleged idiocy as well as the supposed role it played in its own extinction have become irreversibly cemented in the english lexicon dodo and the even less tactful dumb dodo are slang terms directed at dense individuals an explicit reference to the bird s sluggish reflexes and supposedly pint sized brain one may have also come across a business venture or a fad that has gone the way of the dodo or is as dead as a dodo meaning that the venture has become defunct obsolete or a thing of the past most likely due to reckless and half baked business practices the phrase deaf to reality like a dodo has also been thrown around quite frequently in recent years used to describe individuals who are overly trusting and blissfully ignorant of unpalatable facts and ugly truths but were the dodo birds truly as simple minded as they are often portrayed and what were the actual factors behind the zany avian s extinction the dodo the history and legacy of the extinct flightless bird looks at the origins of the

bird human contact with it and how the species went extinct along with pictures depicting important people places and events you will learn about the dodo like never before

takes a close up look at island biogeography the science of the geographic distribution of life on islands and its significance in terms of evolution and extinction

using the history of the concept of extinction with the dodo as a case study pinto correia carefully weaves together story fragments to give a cohesive eye opening view of 17th century exploration and the grave ramifications it had for the survival and extinction of many species more importantly she shows us the intellectual underpinnings of the old view that it was acceptable for some animals to die out within this narrative we can see what the modern view of the dodo tells us about the history of our changing understanding and valuation of nature and our place in it strong writing powered by lively historical anecdotes and sober insights into human behavior makes this beautifully illustrated book a page turner to the end

describes the physical characteristics and habits of the extinct dodo a large flightless bird that lived on the islands of mauritius and reunion in the indian ocean

the mascarene islands in the southern indian ocean mauritius réunion and rodrigues were once home to an extraordinary range of birds and reptiles evolving on these isolated volcanic islands in the absence of mammalian predators or competitors the land was dominated by giant tortoises parrots skinks and geckos burrowing boas flightless rails herons and of course in mauritius the dodo uninhabited and only discovered in the 1500s colonisation by european settlers in the 1600s led to dramatic changes in the ecology of the islands the birds and tortoises were slaughtered indiscriminately while introduced rats cats pigs and monkeys destroyed their eggs the once extensive forests logged and invasive introduced plants from all over the tropics devastated the ecosystem the now familiar icon of extinction the dodo was gone from mauritius within 50 years of human settlement and over the next 150 years many of the mascarenes other native vertebrates followed suit the product of over 30 years research by anthony cheke lost land of the dodo provides a comprehensive yet hugely enjoyable account of the story of the islands changing ecology interspersed with human stories the islands biogeographical anomalies and much else many french publications old and new especially for réunion are discussed and referenced in english for the first time the book is richly illustrated with maps and contemporary illustrations of the animals and their environment many of which have rarely been reprinted

before illustrated box texts look in detail at each extinct vertebrate species while julian hume s superb colour plates bring many of the extinct birds to life lost land of the dodo provides the definitive account of this tragic yet remarkable fauna and is a must read for anyone interested in islands their ecology and the history of our relationship with the world around us

the story of the dodo is a classic of evolution and extinction equal in fascination to that of the dinosaur or the saber toothed tiger unlike these however the dodo was the first recorded example of an extinction that was in all probability entirely caused by humans humankind coexisted with the dodo between 1598 and 1681 and then the dodo was gone hunted to extinction unable to escape the new predators that arrived in ships on the isolated island later known as mauritius the giant pigeon for this was what the dodo was evolved from ancestors that had populated the island millions of years before in the pleistocene period when mauritius was far adrift of where it lies today the pigeons colonized an island paradise abundant with food free of any terrestrial mammalian predators over millions of years they lost their instinct for danger they also lost the ability to fly and grew bulky with sturdy running legs for the 17th century sailors who arrived and settled on the island they were easy to kill and as tasty as the turtles the sailors also caught and ate the sailors introduced domestic animals and rat as well competitors for the dodos habitat so much about the dodo is unknown and will never be known and yet the dodo engenders much speculation the dodo extinction in paradiseexplores the science and the mythology the history archaeology and legend as well as the dodo s place in art and literature

it took less than a hundred years of human influence in mauritius to wipe out the dodo the delicate balance of nature was suddenly tipped and became a threat to the survival of the dodo which had reigned supreme on this island for thousands of years for nearly two hundred years after its extinction the dodo was forgotten and there were some doubts as to whether it actually lived at all it seemed that these strange birds had only been part of the imagination and exaggeration of sailors today the once remote island of mauritius is home to over a million people of european african indian and chinese origin it can boast of being one of the most stable democratic countries in the world and it is host to thousands of tourists who find shops full of dodos in many forms shapes and sizes yet there is an unfortunate lack of information about this island s unique national icon this book allows the reader to examine various eyewitness writings drawings paintings and skeletal remains which depict the dodo as it actually was and helps us to understand how it was driven to extinction it also traces what happened after the final demise of the bird and how worldwide evidence was

pieced together to provide a reasonable idea of how the dodo lived and died back cover

tall awkward and inclined to act impulsively dodo penny worries about entering sixth grade but a summer spent teaching a real dodo to survive helps her learn many things about self acceptance friendship and survival

corlie roux s farm life in south africa is not easy the transvaal is beautiful but it is also a harsh place where the heat can be so intense that the very raindrops sizzle when her beloved father dies she is left with a mother who is as devoted to her sons as she is cruel to her daughter despite this corlie finds solace in her friend siphon and in africa itself and in the stories she conjures for her brothers but corlie s world is about to vanish the british are invading and driving boer families like hers from their farms

some escape into the bush to fight the enemy the unlucky ones are rounded up and sent to internment camps will corlie s resilience and devotion to her country sustain her through the suffering and squalor she finds in the camp at kroonstad that may depend on a soldier from faraway canada and on inner resources corlie never dreamed she had

well versed in natural history particularly geology and ornithology hugh edwin strickland 1811 53 became fascinated by the dodo and mankind s influence on its extinction seeking to investigate this flightless bird and other extinct species from islands in the indian ocean he invited the comparative anatomist alexander gordon melville 1819 1901 to help him separate myth from reality divided into two sections this 1848 monograph begins with strickland s evaluation of the evidence including historical reports as well as paintings and sketches many of which are reproduced melville then analyses the osteology of the dodo and rodrigues solitaire describing his findings from dissections of the few available specimens and making comparisons with similar species a seminal work it correctly concluded that the dodo was more closely related to pigeons than vultures and the book also inspired others to take up the search for new fossil evidence

everyone has heard of the dodo bird that strange creature that would waddle up to hungry sailors only to be eaten for dinner dodo birds have often been looked at as stupid animals that were too dumb to survive but the more we find out about this bird the more we find out that they might not have been so dumb after all here are some things we have found out about them what color were their beaks where did dodo birds live did they like the forest the grasses or the beach how old is the dodo bird why did the dodo bird eat so much when the sailors fed it how long did it take man to kill off the dodo bird after it was discovered find out more about the dodo bird and amaze your family and friends with these fun facts learningisland com believes in the value of children practicing reading for 15 minutes every day our 15 minute books give children lots of fun exciting choices to read from classic stories to mysteries to books of knowledge many books are appropriate for hi lo readers open the world of reading to a child by having them read for 15 minutes a day
