s dynamic health care environment

this issue of clinics in geriatric medicine guest edited by dr steven castle is devoted to falls prevention articles in this important issue include key components of exercise programs in community to prevent falls potential reasons deaths from falls in older adults have doubled in the past decade link between primary care and community based balance exercise programs role of foot orthoses and shoe insoles at improving mobility and balance blood pressure control and falls risk optimizing function and physical activity in hospitalized older adults to prevent functional decline and falls delirium as it relates to falls virtual sitters redesigning a fall prevention program in acute care building on evidence and nursing unit design and hospital falls

despite sustained debate and progress the evolving thing that is evidence based nursing or practice ebp continues to dangle a variety of conceptual and practical loose threads moreover when we think about what is being asked of students and registered or licenced practitioners in terms of ebp it is difficult not to concede that this ask is in many instances quite large and occasionally it may be unachievable ebp has and continues to improve patient client and user care yet significant questions concerning its most basic elements remain unresolved and if nurses are to contribute to the resolution or reconfiguration of these questions then as a first step we must acknowledge their existence from a range of international standpoints and perspectives contributors to this book focus on aspects of ebp that require development this focus is always robust and at times it is unashamedly provocative contributors challenge readers to engage with anomalies that surround the subject and readers are asked to consider the often precarious assumptions that underpin key aspects of ebp while both conflict and concord are evident among the various offerings presented here the book nonetheless creates and sustains a narrative that is bigger or more substantial than the sum of individual parts and across contributions a self assuredly critical stance towards ebp as currently practiced conceptualized and taught coexists alongside respectful admiration for all who make it happen exploring evidence based practice debates and challenges in nursing should be considered essential reading for academics and postgraduate students with an interest in evidence based practice and nursing research
