Excerpt from International Library of Technology 162. A series of 104 books for persons engaged in engineering professions, trades and vocational occupations or for those who desire information concerning them. Fully illustrated. The volumes of the International Library of Technology are made up of instruction papers or sections comprising the various courses of instruction for students of the International Correspondence Schools. The original manuscripts are prepared by persons thoroughly qualified both technically and by experience to write with authority and in many cases they are regularly employed elsewhere in practical work as experts. The manuscripts are then carefully edited to make them suitable for correspondence instruction. The instruction papers are written clearly and in the simplest language possible so as to make them readily understood by all students. Necessary technical expressions are clearly explained. When introduced, the great majority of our students wish to prepare themselves for advancement in their vocations or to qualify for more congenial occupations. Usually they are employed and able to devote only a few hours a day to study. Therefore every effort must be made to give them practical and accurate information in clear and concise form and to make this information include all of the essentials but none of the non-essentials to make the text clear. Illustrations are used freely. These illustrations are especially made by our own illustrating department in order to adapt them fully to the requirements of the text.
