Written by Pascal Dennis, a leading lean consultant, the story follows Tom Pappas and Rachel Armstrong, senior leaders at a desperate automotive company, as they try to implement a lean management system across an entire platform, the Chloe, a breakthrough green car. The future of the company is at stake. Can Tom and Rachel, supported by Andy Saito, a retired, reclusive Toyota executive, regain the trust and respect of the customer? Can a venerable but dying company implement lean practices to every part of their business and learn a new, more effective way of managing? Shows you how to use the lean quality improvement method to fix not just a manufacturing system but an entire company, including management, design, marketing, and supply chain. Written by Pascal Dennis, author of four books on lean practices and winner of the coveted Shingo Prize for outstanding research contributing to operational excellence.
