an excerpt from the introductory in this instruction book the student is advised to begin his photographic education with silver printing in every other hand book so far as we are aware negative making is the first branch described apparently because making a negative is the first step in the production of a photographic picture we are sure from a wide experience of beginners and their requirements that our system will save the student both time and money will render the path to proficiency easier and far more pleasant than it usually is especially for those who have to work entirely alone and will result in a larger proportion of competent workers from a given number of aspirants than any other method in everything we have aimed at simplicity the recommendation of the hydroquinone developer arises from the fact that hydroquinone is the best developer for all round work for negatives lantern slides bromide paper and chloride paper and because one formula may be adapted to all classes of development according to the amount of subsequent dilution some of the newer single solution

developers might have been recommended but if a knowledge of photography is the student s aim there is a distinct advantage in beginning with the use of developer accelerator and restrainer in separate solutions no attempt has been made to exhaust the subject our object is to enable any beginner who will work to do well all that is necessary to the production of good photograms when he has thoroughly mastered the first principles contained in this text book he will have acquired the basis for further work and may then fearlessly launch into the innumerable and fascinating branches of photography and its many applications to the arts and sciences

this textbook covers the essential skills needed for success in taking processing and using photographs it has been specifically designed for use in introductory photography courses within graphics communications and technology education departments

crime scene photography is a book wrought from years of experience with material carefully selected for ease of use and effectiveness in training and field tested by the author in his role as a forensic services supervisor for the baltimore county police department while there are many books on non forensic photography none of them adequately adapt standard image taking to crime scene photography the forensic photographer or more specifically the crime scene photographer must know how to create an acceptable image that is capable of withstanding challenges in court this book blends the practical functions of crime scene processing with theories of photography to guide the reader in acquiring the skills knowledge and ability to render reliable evidence required reading by the iai crime scene certification board for all levels of certification contains over 500 photographs covers the concepts and principles of photography as well as the how to of creating a final product includes end of chapter exercises
