benedict anderson s 1983 masterpiece imagined communities is a ground breaking analysis of the origins and meanings of nations and nationalism a book that helped reshape the field of nationalism studies imagined communities also shows the critical thinking skills of interpretation and analysis working at their highest levels one crucial aspect of anderson s work involves the apparently simple act of defining precisely what we mean when we say nation or nationalism an interpretative step that is vital to the analysis he proceeds to carry out for anderson it is clear that nations are not natural as historians and anthropologists are well aware nations as we understand them are a relatively modern phenomenon dating back only as far as around 1500 but if this is the case how can we agree what a nation is anderson s proposed definition is that they are imagined communities comprising groups of people who regard themselves as belonging to the same community even if they have never met and have nothing in common otherwise the analysis that follows from this insight is all about examining and breaking down the historical processes that helped foster these communities above all the birth of printing and the development of capitalism brilliantly incisive anderson s analysis shows how good interpretative skills can form the foundations for compelling and original insight

teacher who almost never corrected our tests on time since it comes out of the printing business a business hundreds of years old it has a broader meaning it expresses the enduring existence of the written word hence letters black on white are records of people's thoughts and opinions at specific points in time from early signs of human existence on cave walls to digital letters on our modern day computer screens newspapers as a medium for writing are of special interest to historians as well as to ordinary people like you and me throughout history newspapers have reflected society however it would be an oversimplification to reduce the complexity of newspapers to the mere role of mirroring they give us useful information about editors journalists and authors their patient words waiting to be read become vibrant thoughts even though reader and source might be years apart it is the dichotomy of individual and collective experience in reading that creates a readership benedict anderson's concept of imagined communities fits into this context incredibly well although a reader might not know all the other readers of his or her newspaper they still have one thing in common they have all held the same information in their hands and read the same news thus the reader being aware of this indirectly shared experience imagines his community of fellow readers while anderson refers to communities that over

in 1983 benedict anderson's imagined communities revolutionized the anthropology of nationalism anderson argued that print capitalism fostered nations as imagined communities in a modular form that became the culture of modernity now in represented communities john d kelly and martha kaplan offer an extensive and devastating critique of anderson's depictions of colonial history his comparative method and his political anthropology the authors build a forceful argument around events in fiji from world war ii to the 2000 coups showing how focus on imagined communities underestimates colonial history and obscures the struggle over legal rights and political representation in postcolonial nation states they show that the self-determining nation state actually emerged with the postwar construction of the united nations fundamentally changing the politics of representation sophisticated and impassioned this book will further anthropology's contribution to the understanding of contemporary nationalisms
