the present book provides a comprehensive description of some of the most representative solutions that offered by these three projects
along with the ways these solutions can be combined in order to achieve multiplier effects and maximize the benefits of their use

originally presented as the author s doctoral dissertation at technische universiteit delft on november 25 2011

to what degree are trade liberalization productivity and economic growth correlated can economic policies designed to encourage
competition and curtail industry protection result in large scale improvements such as increased innovation and reduced unemployment after
20 years of economic reform in the middle east and north africa mena economic performance is still lagging behind many regions of the
world even in those countries that are the most advanced in implementing reforms including egypt jordan morocco and tunisia industries
with low productivity growth and high market power continue to dominate moreover the termination of the multi fiber agreement and the
negotiations concerning further liberalization of trade in agricultural products under the framework of the world trade organization put these
and other countries under pressure of fierce competition from emerging nations recent empirical evidence on the impact of reforms in a
number of developing countries shows that such persistence of inefficiency and market power is specific to mena showcasing in depth

analyses from jordan morocco tunisia and turkey with comparative data from asia and latin america this book focuses on the dynamics of firm entry and exit to help explain the low productivity of the region the results suggest a number of policy recommendations designed to foster competition which in turn would contribute to innovation productivity growth and improved return on capital investments the book not only reveals important correlations among policy and market factors in mena but suggests fruitful areas of research in other developing regions of the world
