study master mathematics has been specially developed by an experienced author team to support the curriculum and assessment policy statement caps the comprehensive learner s book provides activities that develop learners skills and understanding in each of the topics specified by the mathematics curriculum stimulating mental maths activities for all relevant topics examples based on learners own experiences also provides and innovative teacher s guide

these nationally acclaimed titles ensure students academic success with teachers and parents the key to the master skills series is reinforcing skills through practice using a contemporary approach to learning fundamentals through real life applications

literaturverz s 414 459

the teacher s lesson guide provides easy to follow lessons organized by instructional unit as well as built in mathematical content support lessons include planning and assessment tips and multilevel differentiation strategies for all learners this english spanish edition provides dual language support

math mammoth grade 4 a worktext international version is the student worktext for the first half of grade 4 mathematics and part of the math mammoth grade 4 complete curriculum this book covers addition subtraction patterns graphs large numbers and place value multi digit multiplication time and measuring the worktext contains both the necessary instruction and the problems and exercises the text and the work thus a worktext and is for the most part self teaching please note this is a student worktext and does not contain the answers features math mammoth focuses on conceptual understanding it explains the why so your children can understand the maths not just learn how to do it concepts are often explained with visual models followed by exercises using those models these visual models can take the place of manipulatives for many children however it is very easy to add corresponding manipulatives to the lessons if so desired the curriculum is mastery oriented this means it concentrates fairly long on a topic delving into its various aspects this promotes conceptual understanding as opposed to spiral curricula that often tend to jump from topic to topic too much there is a strong emphasis on mental maths and number sense it requires very little teacher preparation which is a

big help to most parents the curriculum has no separate teacher s manual nor is it scripted the introduction to each chapter has some notes for the teacher concerning the material in the chapter all the instruction is written directly to the student in the worktext and there also exist accompanying videos where you can see maria herself teach the material after each chapter introduction you will find a list of internet links and resources games quizzes animations etc that can be used for fun illustrations and further practice for multiplication tables and division facts you can use our online practice program free the other parts of math mammoth grade 4 international version are grade 4 b student worktext grade 4 answer keys and grade 4 tests and cumulative revisions

engage students in mathematics using growth mindset techniques the most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts in this volume you ll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the first grade level through visualization play and investigation during their work with tens of thousands of teachers authors jo boaler jen munson and cathy williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach so the authors designed mindset mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning open creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential the tasks in mindset mathematics reflect the lessons from brain science that there is no such thing as a math person anyone can learn mathematics to high levels mistakes struggle and challenge are the most important times for brain growth speed is unimportant in mathematics mathematics is a visual and beautiful subject and our brains want to think visually about mathematics with engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics mindset mathematics is organized around nine big ideas which emphasize the connections within the common core state standards ccss and can be used with any current curriculum
