these papers stem from the isott meeting held in churchill college cambridge from july 27th to 30th 1986 although the sun did communications and discussions were as lively and informative and some views the meeting was conducted in a generally informal way which allowed maximum time for discussion but the relatively unstructured nature of the debates made them unsuitable for publication the amount of editing necessary meant that the printed version of the exchanges would bear little resemblance to the original hence their omission all the papers presented here have been scrutinized and retyped in a standard format however the diverse interests of isott s members reflected in the wide spectrum of the material submitted made total editorial uniformity an unrealistic goal complete consistency in the use of symbols abbreviations and units seemed less important than speed of publication we are very grateful to all those who contributed to the smooth running of the meeting itself and to the production of this book
