what are the grand dynamics that drive the accumulation and distribution of capital questions about the long term evolution of inequality the concentration of wealth and the prospects for economic growth lie at the heart of political economy but satisfactory answers have been hard to find for lack of adequate data and clear guiding theories in this work the author analyzes a unique collection of data from twenty countries ranging as far back as the eighteenth century to uncover key economic and social patterns his findings transform debate and set the agenda for the next generation of thought about wealth and inequality he shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by karl marx but we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following world war ii the main driver of inequality the tendency of returns on capital to exceed the rate of economic growth today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken but economic trends are not acts of god political action has curbed dangerous inequalities in the past the author says and may do so again this original work reorients our understanding of economic history and confronts us with sobering lessons for

so much has changed during the past decade in political campaigning that we can almost say it's a whole new ball game. This book analyzes the way campaigns were traditionally run and the extraordinary changes that have occurred in the last decade. Dennis W. Johnson looks at the most sophisticated techniques of modern campaigning: micro-targeting, online fundraising, digital communication, the new media, and examines what has changed, how those changes have dramatically transformed campaigning, and what has remained fundamentally the same. Despite new technologies and communications, campaigns are becoming more open and free-wheeling with greater involvement of activists and average voters alike, but they can also become more chaotic and difficult to control. Campaigning in the twenty-first century presents daunting challenges for candidates and professional consultants as they try to get their messages out to voters. Ironically, the more open and robust campaigns become, the greater is the need for seasoned, flexible, and imaginative professional consultants.

When the United States entered World War I, President Woodrow Wilson declared to Congress that the objective was not merely to bring a new balance of power but rather to bring a just and secure peace to the world by the end of the conflict. In this famous speech, known as the Fourteen Points, Wilson offered the world a road map toward a more equitable international system. In the midst of unprecedented global conflict, including ideas on the interconnectedness of democracy, trade, and the concept of a forum for peaceably resolving international disputes. Even decades after the end of the first world war, Wilson's ideas remained important and influenced many of his successors. But now in the twenty-first century, there are forces at work in the world that Wilson could never have imagined, and those forces call for a new plan toward peace. In Fourteen Points for the Twenty-First Century, a renewed appeal for cooperative internationalism, Richard H. Immerman and Jeffrey A. Engel bring together a diverse group of thinkers who take up Wilson's call for a new world order by exploring fourteen new directions for the twenty-first century. The contributors, scholars, policymakers, entrepreneurs, poets, doctors, and scientists, propose solutions to contemporary challenges such as migration, global warming, health care, food security, and privacy in the digital age. Taken together, these points challenge American leaders and policymakers to champion an international effort not to make America great again but to work cooperatively with other nations on the basis of mutual respect.

The editor in chief of the Economist illuminates what global issues mattered in the last century and how the ways in which we deal with them will shape our lives in the next. The attacks on September 11th, 2001, shook the rich West out of its complacency. Suddenly, peace looked to be in peril, even before that time prosperity was endangered as campaigns mounted against the purported evils of capitalist globalization, such as inequality, pollution, and financial instability, and as America's high-tech stock market boom turned to bust. Yet in the decade following the end of the Cold War, prospects had looked so rosy with peace prevailing among the world's great powers, with billions of people joining the world market economy, and with great waves of technological change driving

economies forwards what to make of such confusion and disappointment what will the 21st century be like now bill emmott editor of the world s leading current affairs weekly the economist argues that the best way to think about the future is to look back at the past at the forces that have shaped our world and at what they tell us about the things that really matter in determining whether we are at peace or at war in a state of liberty or repression in a period of prosperity or of depression from the twentieth century we can learn that two questions matter above all others will america continue to lead the world and to protect its peace and will we continue to accept capitalism with all its strengths and weaknesses or will it be challenged once again bill emmott s 20 21 vision provides the answers that matter for all our lives in the twenty first century
