moving beyond modern portfolio theory investing that matters tells the story of how modern

portfolio theory mpt revolutionized the investing world and the real economy but is now showing its age mpt has no mechanism to understand its impacts on the environmental social and financial systems nor any tools for investors to mitigate the havoc that systemic risks can wreck on their portfolios it s time for mpt to evolve the authors propose a new imperative to improve finance s ability to fulfil its twin main purposes providing adequate returns to individuals and directing capital to where it is needed in the economy they show how some of the largest investors in the world focus not on picking stocks but on mitigating systemic risks such as climate change and a lack of gender diversity so as to improve the risk return of the market as a whole despite current theory saying that should be impossible moving beyond mpt recognizes the complex relations between investing and the systems on which capital markets rely investing that matters embraces mpt s focus on diversification and risk adjusted return but understands them in the context of the real economy and the total return needs of investors whether an investor an mba student a finance professor or a sustainability professional moving beyond modern portfolio theory investing that matters is thought provoking and relevant its bold critique shows how the real world already is moving beyond investing orthodoxy
