considering that orkney is a group of relatively small islands lying off the northeast coast of the scottish mainland its wealth of neolithic archaeology is truly extraordinary an assortment of houses chambered cairns stone circles standing stones and passage graves provides an unusually comprehensive range of archaeological and architectural contexts yet in the early 1990s there was a noticeable imbalance between 4th and 3rd millennium cal bc evidence with house structures and villages being well represented in the latter but minimally in the former as elsewhere in the british isles the archaeological visibility of the 4th millennium cal bc in orkney tends to be dominated by the monumental presence of chambered cairns or tombs in the 1970s claude lévi strauss conceived of a form of social organization based upon the house sociétés à maisons in order to provide a classification for social groups that appeared not to conform to established anthropological kinship structures in this approach the anchor point is the house understood as a conceptual resource that is a consequence of a strategy of constructing and legitimizing identities under ever shifting social conditions drawing on the results of an extensive program of fieldwork in the bay of firth mainland orkney the text explores the idea that the physical appearance of the house is a potent resource for materializing the dichotomous alliance and descent principles apparent in the archaeological evidence for the early and later

neolithic of orkney it argues that some of the insights made by lévi strauss in his basic formulation of sociétés à maisons are extremely relevant to interpreting the archaeological evidence and providing the parameters for a social narrative of the material changes occurring in orkney between the 4th and 2nd millennia cal bc the major excavations undertaken during the cuween wideford landscape project provided an unprecedented depth and variety of evidence for neolithic occupation bridging the gap between domestic and ceremonial architecture and form exploring the transition from wood to stone and relationships between the living and the dead and the role of material culture the results are described and discussed in detail here enabling tracing of the development and fragmentation of sociétés à maisons over a 1500 year period of northern isles prehistory
