an introduction to network simulator ns2 is a beginners guide for network simulator ns2 an open source discrete event simulator designed mainly for networking research ns2 has been widely accepted as a reliable simulation tool for computer communication

networks both in academia and industry this book will present two fundamental ns2 concepts i how objects e g nodes links queues etc are assembled to create a network and ii how a packet flows from one object to another based on these concepts this book will demonstrate through examples how new modules can be incorporated into ns2 the book will give an overview on simulation and communication networks provide general information e g installation key features etc about ns2 demonstrate how to set up a simple network simulation scenario using tcl scripting language explain how c and otcl object oriented tcl are linked and constitute ns2 show how ns2 interprets a tcl script and executes it suggest post simulation processing approaches and identify their pros and cons present a number of ns2 extension examples discuss how to incorporate matlab into ns2

created to help scientists and engineers write computer code this practical book addresses the important tools and techniques that are necessary for scientific computing but which are not yet commonplace in science and engineering curricula this book contains chapters summarizing the most important topics that computational researchers need to know about it leverages the viewpoints of passionate experts involved with scientific computing courses around the globe and aims to be a starting point for new computational scientists and a reference for the experienced each contributed chapter focuses on a specific tool or skill providing the content needed to provide a working knowledge of the topic in about one day while many individual books on specific computing topics exist none is explicitly focused on getting technical professionals and students up and running immediately across a variety of computational areas

democratic decline in the united states and globally a lack of confidence in political institutions and an increasingly violent and divisive political climate raise many questions for the state of political learning and civic engagement a decade ago a task force

commissioned by the united states department of education called on colleges and universities to affirm their missions to educate for democracy relatively few have made the investment though dozens of higher education associations and organizations have publicly committed their support to prepare students to address the persistent public issues they are inheriting while there has been a recent upward spike in rote civic knowledge and historically high youth voting rates the united states has seen a decline in political rights and civil liberties and has been listed as a backsliding democracy since 2010 state legislatures have passed laws making it harder to vote with access to the ballot increasingly dependent on which party controls the state legislature meanwhile substantial dysfunction and hyperpartisanship in congress concerns over the impartiality of the judiciary and limited accountability and oversight of the executive branch have contributed to the loss of institutional capacity to address public problems and to declining public confidence in political institutions these trends coincide with problematic rhetoric and growing scrutiny from public officials on how colleges and universities educate students on public issues particularly those centered on class race ethnicity and social justice issues of free speech and expression have been further nationalized following a high profile hearing of the house committee on education and the workforce that questioned the presidents of harvard massachusetts institute of technology and university of pennsylvania about antisemitism on their campuses and as campus protests regarding the israeli palestinian conflict have been met with heavy handed responses these episodes serve as loud warning shots to colleges and universities across the country academic freedom and freedom of speech core tenets of a liberal education are at risk can higher education step up and meet the moment collectively contributors to this volume who come from a broad range of institutions experiences and perspectives provide critical research and analyses as well as innovative approaches for how higher education can fulfill its public role and contribute to building the democratic societies we need
