in a brief history of history acclaimed historian jeremy black seeks to reinvigorate and redefine our ideas about history the stories we tell about the past are a crucial aspect of all cultures however while the traditional storytelling process what we think of as history in the proper sense is useful it is also misleading not least because it leads to the repetition of bias and misinformation black suggests that the conventional idea of history and historians is constructed too narrowly as it fails to engage with the broad nature of lived experience by focusing on a singular idea or story within the history being explored we fail to understand the interconnectivity of the everyday experience a brief history of history challenges accepted norms of the

historical perspective and offers a view of human history that will surprise many and perhaps infuriate some but above all it is a history of historians written for this moment in time a time when the traditional eurocentric approach to history now appears wholly inappropriate

this is a history of the use of bayes theorem from its discovery by thomas bayes to the rise of the statistical competitors in the first part of the twentieth century the book focuses particularly on the development of one of the fundamental aspects of bayesian statistics and in this new edition readers will find new sections on contributors to the theory in addition this edition includes amplified discussion of relevant work
