modern borders of all kinds political geographical and social effect the kinds of prehistoric narratives archaeologists can write borders that dominate today did not exist in prehistory this volume works across such borders and focuses specifically on the region between the rivers forth and tyne an area divided by the modern political border between scotland and england the introduction and opening chapters consider the impact of the anglo scots and similar borders on our understanding of prehistoric patterns of activity the introduction also asks whether when and to what extent this could be considered a coherent region in the prehistoric past further chapters explore the history of research in the region including field survey and aerial photography another nine chapters discuss the results of recent research including new and older excavations or conduct regional analyses of artefacts and mortuary practices starting with the late upper palaeolithic and continuing with studies from the early neolithic through to the late iron age taken as a whole the publication suggests that while there was no coherent tyne forth region in prehistory except for perhaps in the late iron age research at this regional scale provides a strong basis for appreciating past cultural interaction at a variety of scales from publisher s website

dorothy garrod opened many doors not only was she the first female professor at cambridge university but she illuminated and in

some cases initiated some of prehistoric archaeology's most central issues the quiet yet self possessed woman was best known as a fieldworker often venturing into dangerous regions such as kurdistan her first and highly successful excavation revealed fragments of neanderthal fossils in gibraltar this volume reviews modern research on this site as well as exploring other issues which interested the disney professor of archaeology hominid remains from mount carmel palaeolithic sites in the zagros mountains bulgaria and britain and the cultural evidence for the beginning of near eastern food production which garrod called natufian also included are papers concerned with her life background and published work the topics span and continuing relevance are testament to dorothy garrod's remarkable character and great achievements

the later prehistory of north west europe provides a unique up to date and easily accessible synthesis of the later prehistoric archaeology of north west europe transcending political and language barriers that can hinder understanding by surveying changes in social forms landscape organization monument types and ritual practices over six millennia the volume reassesses the prehistory of north west europe from the late mesolithic to the end of the pre roman iron age it explores how far common patterns of social development are apparent across north west europe and whether there were periods when local differences were emphasized instead in relation to this it also examines changes through time in the main axes of contact between the various regions of continental europe britain and ireland key to the volume's broad scope is its focus on the vast mass of new evidence provided by recent development led excavations the authors collate data that has been gathered on thousands of sites across britain ireland northern france the low countries western germany and denmark using sources including unpublished grey literature reports the results

challenge many aspects of previous narratives of later prehistory allowing the volume to present a distinctively fresh perspective

this fascinating volume on submerged prehistoric landscapes of the north sea brings together for the first time comparative archaeological evidence from norway denmark germany netherlands and the uk the reports describe a range of submerged sites and artefacts occupied or used during the late pleistocene and early holocene periods of glacially controlled low sea level when large areas of the north west european continental shelf were dry land they show that palaeolithic mesolithic and neolithic peoples created settlements on the contemporaneous coastlines at periods of low sea level and probably in the hinterlands of the central north sea sometimes known as doggerland the age of most known submerged sites is in the range of 8000 5000 years ago but older submerged sites have been discovered outside the north sea region as well as recording existing findings the contributions analyse the potential for prehistoric archaeology research on the floor of the north sea and plan those subjects most requiring study the volume also recommends ways to cooperate across national boundaries and with industry on future research and protection of prehistoric sites on the sea floor

an overview of archaeological research in michigan that reveals the history of the state during the past four hundred years michigan has long been an incubator for invention technology and creativity this book explores this legacy through the historical archaeology of the past four hundred years in the state illustrating how michigan s history reflects the broader american experience through themes of entrepreneurship immigration capitalism and civil rights written by three archaeologists who have dedicated more than 75 years to research in the state the chapters in this book describe the construction of encampments and fortifications that facilitated seventeenth century european colonization the rise of the fur trade and natural resource extraction and the impact of land acquisition by white settlers who built farmsteads and logging camps in the nineteenth century the authors examine detroit s urban development revealing how industrial capitalism led to inequality and segregation they also highlight the pivotal role of michigan archaeologists

within the discipline of historical archaeology the archaeological findings discussed here associated with anishinaabe peoples settler colonialism immigrants agriculture industry and urbanization illustrate the distinct ways in which the american experience was lived in michigan the historical archaeology of michigan brings together a wealth of information to show how michigan s people have maintained their sense of belonging and embraced their citizenship while adapting to economic political social and cultural challenges

the chapters in this edited volume present multi disciplinary case studies of prehistoric archaeological sites located on now submerged portions of the continental shelf each chapter represents an extension of the known prehistoric record beyond the modern shoreline case studies represent central themes of landscape change climate change and societal development using new technologies for mapping monitoring and managing these sites

grahame clark s book examines the development of prehistoric archaeology at cambridge and the achievements of its graduates placing this theme against the background of the growth of archaeology as an academic discipline worldwide prehistory in cambridge began to be taught formally in 1920 and emerged as a full tripos soon after the second world war from the outset it focused on the aims and methods of archaeological research providing in addition for combinations of study options ranging from early prehistory to the archaeology of the major civilisations of the old world and the protohistory of northern europe the measure of its success is shown by the achievement of cambridge graduates at home and overseas in both the study and the field a significant outcome of their work has been the widespread recognition of archaeology as a subject of broad educational value not merely for undergraduates but for human beings the world over

this unique book offers a theoretical framework for historical archaeology that explicitly relies on network theory charles e orser jr

demonstrates the need to examine the impact of colonialism eurocentrism capitalism and modernity on all archaeological sites inhabited after 1492 and shows how these large scale forces create a link among all the sites orser investigates the connections between a seventeenth century runaway slave kingdom in palmares brazil and an early nineteenth century peasant village in central ireland studying artifacts landscapes and social inequalities in these two vastly different cultures the author explores how the archaeology of fugitive brazilian slaves and poor irish farmers illustrates his theoretical concepts his research underscores how network theory is largely unknown in historical archaeology and how few historical archaeologists apply a global perspective in their studies a historical archaeology of the modern world features data and illustrations from two previously unknown sites and includes such intriguing findings as the provenance of ancient brazilian smoking pipes that will be new to historical archaeologists

major events of human prehistory such as the post glacial recolonization of northern europe and the spread of agriculture through the mediterranean took place on landscapes that are now at least partially underwater large parts of this submerged terrain are accessible to divers and can be investigated archaeologically prehistoric underwater research has emerged in recent decades as a distinct sub discipline developing approaches and methodologies that can be applied in coastal regions worldwide as a result there is growing awareness of the potential for underwater archaeology to transform our ideas about the course of prehistory this volume examines existing practice and new developments in the field of submerged prehistoric landscape research the 25 peer reviewed contributions from leading authors cover the results of recent research on three continents and the application of methodologies and techniques for site discovery investigation and interpretation

margarita diaz andreu offers an innovative history of archaeology during the nineteenth century encompassing all its fields from the origins of humanity to the medieval period and all areas of the world the development of archaeology is placed within the framework of contemporary political events with a particular focus upon the ideologies of nationalism and imperialism diaz andreu examines a wide range of issues including the creation of institutions the conversion of the study of antiquities into a profession public memory changes in archaeological thought and practice and the effect on archaeology of racism religion the belief in progress hegemony and resistance

in studying the past archaeologists have focused on the material remains of our ancestors prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context in short historical archaeology provides direct evidence for how humans have shaped the world we live in today historical archaeology is a branch of global archaeology that has grown in the last 40 years from its north american base into an increasingly global community of archaeologists each studying their area of the world in a historical context where historical archaeology started as part of the study of the post columbian societies of the united states and canada it has now expanded to interface with the post medieval archaeologies of europe and the diverse post imperial experiences of africa latin america and australasia the 36 essays in the international handbook of historical archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology the volume is divided into two sections the first reviewing the key themes issues and

approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world this key reference work captures the energy and diversity of this global discipline today
