this book takes a closer look at the sun short and clear text are paired with plenty of colorful photos to make reading engaging and accessible the book also includes a table of contents a glossary and an index

it s the hottest day of the year hotter than broccoli soup hotter than the atacama desert hotter than the surface of the sun it s just the right kind of day for a boy and his grandad to go for a picnic but as the sun beats down grandad keeps having to stop for a rest and by the time they find the perfect picnic spot some pirates have beaten them to it good job they have enough food to share sun is the third title in sam usher s acclaimed seasonal series following on from snow and rain combined sales of snow and rain total over 70 000 copies

the sun is so powerful so much bigger than us that it is a terrifying subject yet though we depend on it we take it for granted amazingly the first book of its kind chasing the sun is a cultural and scientific history of our relationship with the star that gives us life richard cohen applying the same mix of wide ranging reference and intimate detail that won outstanding reviews for by the sword travels from the ancient greek astronomers to modern day solar scientists from stonehenge to antarctica site of the solar eclipse of 2003 when penguins were said to sing mexico s aztecs to the norwegian city of tromsø where for two months of the year there is no sun at all he introduces us to the crucial sunspot cycle in modern economics the religious dances of indian tribesmen the histories of sundials and calendars the plight of migrating birds the latest theories of global warming and galileo recording his discoveries in code for fear of persecution and throughout there is the rich sun literature from the writings of homer through dante and nietzsche to keats shelley and beyond blindingly impressive and hugely readable this is a tour de force of narrative non fiction

the sun has been an object of scientific interest since the time of the ancient greeks the vast amounts of observational data acquired in recent years have led to a greatly improved knowledge of the physics of the sun with a minimum of technicalities this book gives an account of what we now know about the sun s interior its surface and atmosphere its relation to the solar system including the earth and its relation to other stars the way that solar power is being converted to useful forms of energy is

explained the book is aimed at anyone with a broad science background interested in learning about the latest developments in solar studies from those at high school level to the non specialist professional

a fascinating look at how humans relationship with the sun continues to shape our bodies attitudes and societies our biology is set up to work in partnership with the sun little wonder then that humans have long worshipped and revered our nearest star life itself arose on earth because its relationship with the sun was a special one and that relationship still affects us well into the era of electric lighting indoor workdays and vitamin d supplements what we are losing when we sever this ancient biological tie to the sun by spending more and more time inside during the day and surrounded by screens at night informed by cutting edge scientific research and sparkling with memorable characters from the modern druids who worship at stonehenge each solstice to the amish farmers who may have the right idea about healthy sleep patterns linda geddes s chasing the sun analyzes all aspects of our relationship to the sun which continues to shape our bodies and minds in the twenty first century the fascinating stories innovative science and unique perspectives in this book make it clear that the ancients were right to put the sun at the center of our world and it is crucial that we remember this bond as we shape our lives today

read this book to find out about the sun in our solar system books in this series introduce children to outer space each book uses simple repetitive text to teach children basic vocabulary and includes stunning photographs and artwork to show the main features of our solar system in the sun children learn what the sun is what it is made of and how it influences the planets in the solar system

to celebrate the launch of quick reads in 2006 the sun ran a short story competition called get britain reading in order to find the hidden talent among its millions of readers this book contains a selection of the winning entries they may make you smile laugh or cry but all of them are sure to entertain you

in this completely updated edition of the sun featuring beautiful full color photographs seymour simon presents a fascinating introduction to the star that is the center of our solar system young readers will love exploring the wonders of the sun from the

constant nuclear explosions at its core to the sea of boiling gases that forms its surface seymour simon knows how to explain science to kids and make it fun he was a teacher for more than twenty years has written more than 250 books and has won multiple awards this book includes an author s note glossary and index and supports the common core learning standards next generation science standards and the science technology engineering and math stem standards

it s bright and it s hot it s the center of our solar system it is our sun as readers journey through this book they will discover how this amazing star came into existence and they will learn everything about its size and makeup its solar winds and flares and how its light and heat affect earth the workings of the sun s magnetic field sun spots and the latest technology used to study the sun will also captivate our readers planets and stars moons and galaxies the universe is a vast and mysterious place with much to explore and there s no better way to make amazing discoveries about space than with this reimagined series with the latest nasa imagery the classic structure and features of a true book and lively text the titles in our universe bring the awe of the cosmos directly to readers students will come away with a wealth of knowledge about the incredible celestial bodies in our universe this series covers next generation science standards core ideas including the universe and its stars and earth and the solar system

introduces the very special star known as the sun using a blend of poetry and science includes a sound cassette with which to read along

all of the planets in our solar system circle around one giant ball of gases the sun this simple yet fascinating book explains how the sun was formed and where its energy comes from readers learn to identify the different parts of the sun a hands on activity investigates the sun s changing place in our sky while full color photographs and fast facts enhance the narrative this book correlates directly with the next generation science standards expectation for understanding earth s place in the universe in first and second grades it is also aligned with english language arts standards

at a time when each society had its own medium of propogation of its researches in the form of transactions proceedings journals etc a need was strongly felt for bringing out a journal devoted exclusively to the study and advancement of indian culture in all its

aspects this encouraged jas burgess to launch the indian antiquary in 1872 the scope was in his own words as wide as possible incorporating manners and customs arts mythology feasts festivals and rites antiquities and the history of india another laudable aim was to present the readers abstracts of the most recent researches of scholars in india and the west indian antiquary also dealt with local legends folklore proverbs etc in short indian antiquary was entirely devoted to the study of man the indian in all spheres introduction to facsimile volumes published 1985

an encyclopedia designed especially to meet the needs of elementary junior high and senior high school students
