art and architecture of uttarakhand is the first ever comprehensive study on the art and architectural legacy of the newly formed hill state of uttarakhand this mountainous state can proudly boast of being that part of the subcontinent wherefrom the indian civilisation developed and proliferated to the pan indian dimension in fact the kedarkhand the classical identity of this region formed an integral part of the aryavart or the bharat since the first settlement of the indo aryans in the gangetic plains the snow clad himalayan ranges of kedarkhand have been the source of perpetual attraction and inspiration to the multitude of humanity the world over this region has been the grand repository of diverse cultures since the khasha and kirati cultures intermingled here ages ago and as the wheels of time rolled by innumerable ethno cultural milieus developed flourished and vanished here the imprints of all those past identities are still buried under the substratum of the dominating brahminic culture obviously uttarakhand should be one of the archaeologically richest parts of the sub continent in the present study an attempt has been made for the first time to discover all those subterranean evidences material and non material to present a wholesome picture of the culture scenario of uttarakhand in all its vividness while the material evidences of the two most dominating religions in the history of this region buddhism and brahminism have been adequately analysed and discussed in the context of the standing temples the anterior khasha culture has also been brought to light and the religious and socio cultural facets of that exotic culture discussed in the context of the standing wooden temples the surviving material evidences of what may be defined as the khasha architecture in fact in the present work a wholesome and cognizable picture of the past cultures of this region has been presented through archaeology in uttarakhand the tradition of painting remained confined only to what earlier used to be the garhwal kingdom miniature painting flourished in that

kingdom under the influence of mughal and western pahari schools ironically without feudal patronage in such a situation could an art architecture of uttarakhand progression to perfect publishing independent school of painting flourish here is a problem that has been thoroughly discussed so far our knowledge about the tradition of painting in garhwal has remained subjective and biased it is for the first time that the problem whether garhwal school of painting has been subjected to the acid test to ascertain the reality nevertheless the garhwal atelier did inspire painting on the walls of guru ram rai durbar at dehradun in the akharas and havelis at kankhal and havelis at saharanpur it is again for the first time that the tradition of miniature painting and wall painting in uttarakhand has been studied objectively and in a comprehensive manner in the present work art and architecture of uttarakhand therefore has a legitimate claim to be the pioneering and trail blazing work in many respects

using the recent turn to ecology as a starting point hannah richter and elisa randazzo bring ecological thinking into contact with critical indigenous studies in which awareness of the necessity for sustainable relations between humans and non humans has long preceded western anthropocene discourse currently the drastic ecological changes labelled as the anthropocene not only increasingly shape the political awareness and the priorities of citizens and governments but also inform a large body of social scientific scholarship indigenous scholarship and practice in particular ecological adaptability is intrinsically related to power structures and political struggle hence indigenous understanding of anthropocene discourses are intertwined with discourses of colonialism and political contestation this book problematises the depoliticising character of western anthropocene discourses in relation to indigenous ecologies the authors reveal how the anti colonial struggles of indigenous communities and the unequal distribution of responsibilities for and suffering from ecological change are concealed and devalued in western discourses of the anthropocene
