this book offers intermediate learners of english as a foreign language an original and stimulating learning experience it introduces them to the beginnings of british literature starting from the anglo saxon world and continuing up to the beginning of the renaissance the texts chosen cover the development of poetry narrative and the theatre and the historical and social context from which they are drawn no attempt has been made to offer an encyclopaedic survey of all authors and their works rather a representative selection has been made from the various historical periods including many classic works

the intensifying climate crisis has put the world on high alert for those living in the high consuming high polluting swaths of the world it is clear that something about our society our politics our economy our very way of life must change but the nature of those necessary changes is a source of seemingly intractable dispute does the answer lie in stimulating the dynamism of capitalist market forces with a carbon price or in the deployment of new climate engineering technologies or does it lie in still more radical changes

something akin to a wartime like mobilization to rapidly build a more just post carbon world or a shift to an ecologically bounded society that has transcended perpetual capitalist growth our ideologies the competing ways we believe the world should be powerfully affect how we see the problem of climate change and what we think ought to be done about it in this highly original and accessible book saad presents an erudite survey of political perspectives and ethical arguments about how we should respond to the climate crisis by arranging these approaches into two broad categories of system preserving and system changing frameworks saad takes the reader on a journey through competing ideas about how we can address our collective responsibility to create a livable global future

this exceptional text builds your knowledge of pharmacology by first providing an overview of pharmacologic principles and then teaching you how to apply those principles to clinical practice focusing on applying pharmacologic scientific knowledge to clinical practice it explains diagnostic and treatment reasoning and rational drug selection while providing useful clinical pearls from experienced practitioners
