this novel and original book examines and disaggregates theoretically and empirically operations of power in international security regimes these regimes varying in degree from regulatory to prohibitory are understood as sets of normative discourses political structures and dependencies anarchies hierarchies and heterarchies and agencies through which power operates within a given security issue area with a regulatory effect in international relations regime analysis has been dominated by several generations of regime theory theorization as this book makes clear not only has the ir regime theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes but it too heuristically suffered from its rigid pegging to general ir theory it is not surprising then that the evolution of ir regime theory has largely been mirroring the evolution of ir theory in general from the neo realist neo liberal institutionalist convergence regime theory through cognitivism to constructivist regime theory the commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes it provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes which goes beyond one or another school of ir regime theory in doing so it completely abandons existing and piecemeal analysis of regimes within the intellectual field of ir based on conventional grand mid range theorization
