this book systematically assesses the political and social values of the more than 1.3 billion catholics around the globe by far the largest denomination of western christianity based on an extensive analysis of data from the world values survey and other global opinion surveys the book sheds new light on the value systems and opinions of roman catholics the authors highlight core problems and challenges the church is currently facing in adapting to the modern world including catholic anti semitism religious and sexual tolerance and opinions towards democracy while also offering an anthropological reflection on how well the church is adapting or failing to adapt to the requirements of an open society

with descriptions of more than 12 000 newsletters in 4 000 different subject areas this comprehensive resource is an invaluable research tool

the borgia family rumor and representation explores the historical and cultural structures that underpin the early modern borgia family their notoriety and persistence and reinvention in the popular imagination the book balances studies focusing on early modern observations of the borgias and studies deconstructing later incarnations on the stage on the page on the street and on the screen it reveals how contemporary observers later authors and artists and generations of historians reinforced and perpetuated both rumor and reputation ultimately contributing to the borgia black legend and its representations focused on the deeds and posthumous reputations of pope alexander vi and his children cesare and lucrezia borgia the volume charts the choices made by the family and contextualizes them amid contemporary expectations and reactions extending beyond their deaths it also investigates how the borgias became emblems of anti catholic and anti spanish criticism in the later early modern period and their residing reputation as the best and worst of the renaissance exploring a spectrum of traditional and modern media the borgia family contextualizes both borgia deeds and their modern representations to analyze the family

s continuing history and meaning in the twenty first century it will be of great interest to researchers and students working on interdisciplinary aspects of the renaissance and early modern italy

from two authors who embrace technology in the classroom and value the role of collaborative learning comes college geometry using geogebra a book that is ideal for geometry courses for both mathematics and math education majors the book s discovery based approach guides students to explore geometric worlds through computer based activities enabling students to make observations develop conjectures and write mathematical proofs this unique textbook helps students understand the underlying concepts of geometry while learning to use geogebra software constructing various geometric figures and investigating their properties relationships and interactions the text allows students to gradually build upon their knowledge as they move from fundamental concepts of circle and triangle geometry to more advanced topics such as isometries and matrices symmetry in the plane and hyperbolic and projective geometry emphasizing active collaborative learning the text contains numerous fully integrated computer lab activities that visualize difficult geometric concepts and facilitate both small group and whole class discussions each chapter begins with engaging activities that draw students into the subject matter followed by detailed discussions that solidify the student conjectures made in the activities and exercises that test comprehension of the material written to support students and instructors in active learning classrooms that incorporate computer technology college geometry with geogebra is an ideal resource for geometry courses for both mathematics and math education majors

the book is about strong axioms of infi nity in set theory also known as large cardinal axioms and the ongoing search for natural models of these axioms assuming the ultrapower axiom a combinatorial principle conjectured to hold in all such natural models we solve various classical problems in set theory for example the generalized continuum hypothesis and uncover a theory of large cardinals that is much clearer than the one that can be developed using only the standard axioms

health education well being improvement and advocacy are effective health promotion strategies among cutting edge public health practices salutogenic perspectives rooted in ecological models have taken their rightful place to empower individuals and communities to change their life ecosystems and preserve and improve their health it is imperative to shift from targeting protective or risk factors which have linear causal relationships with health conditions and or comorbidities and encompass a systemic understanding of the role of health determinants in creating health individual collective and structural ecological approaches can better reduce health inequities moreover engaging the presumed beneficiaries from such strategies ensures that actual needs are identified and choices are context specific it improves the whole implementation process as well as its results higher levels of participation such as co creation imply a bottom up voluntary collaborative process rooted in values of diversity mutual trust openness autonomy freedom and respect as well as shared expertise responsibility and decision making which are essential values in co creating health promotion
