the democratic education network den is a collaborative group involving academic staff and students that aims to organize and support the educational experience of students at the university of westminster den has inspired students to engage locally and globally since the outbreak of covid 19 den has played a significant role engaging students online

and aiming to facilitate their learning process this book is a compilation of papers written by both students at the university of westminster and its partner international universities the book brings together different topics and concepts related to the governance and management of the global covid 19 pandemic it analyses the political economic and social impact of covid 19 on the agendas set by governments all around the world this edition of the book is a manifestation of the collective teamwork i am so pleased to see the hard work of staff and students in the democratic education network come to fruition in this excellent publication i recognise the value of these collaborations in our turbulent times and it is lovely to see students and academic staff from all over the world come together to develop meaningful and challenging scholarship working in partnership with students is such a strength of the culture at the university of westminster and it is great to see this work demonstrated so effectively in this text

a fortnightly bulletin on financial and political trends

the goal of this book is to present a review of the different categories of liver disease as well as address the role of surgery in managing these complex diseases the book includes chapters written by international experts on the most current indications and guidelines regarding the diagnoses and management of liver diseases as well as a variety of technical elements involved with the surgical procedures different surgical techniques involved in performing a hepatectomy will be discussed including various instruments used as well as the effect of modern technology as evidenced by novel procedures an important focus of the book has been identifying the proper place of all these hepatectomy methods in the armamentarium of the experienced hepatobiliary surgeon including the role of locoregional treatments such as ablation and embolization as adjuncts finally the role of hepatectomy compared to orthotopic liver transplantation is discussed so that the reader can have a well rounded picture of the challenges and opportunities involved overall this book has the potential to serve as an invaluable tool for both the hepatologist and the internist as well as for the hepatic surgeon

this book explores disability across time and space from ancient egypt as a culture to egyptology as a contemporary field to go beyond simply identifying disability encouraging readers to thoughtfully consider the history of disabled people in ancient egypt and egyptology through a critical investigation this volume reshapes often overlooked narratives of disability within the discipline of egyptology and egyptian archaeology chapters explore evidence of

disability the historiographical ways in which disability has been approached and how disability histories are misrepresented in various contemporary spaces coverage stretches across egypt and nubia from the predynastic to the roman periods as well as receptions of these cultures and disability in museums its editors and many of its authors are disability community members who are experts in their respective professions comprising an international authorship and including voices from typically underrepresented groups contributors range from early career researchers to senior scholars as well as those working outside of and adjacent to academia while focusing on ancient egypt and egyptology this volume offers new ways to consider disability in the broadest possible sense it uses terminology informed by the disability community and offers guidance for disability inclusivity in curatorial and pedagogical museum and university contexts it prioritises disability as an essential area of research in ancient world studies and platforms both ancient and modern disabled voices the deep detailed exploration into disability in the past and in our discipline offered by this book inspires readers to further explore and appreciate the infinite diversity of the human experience in all its infinite combinations the first book length treatment of the subject disability in ancient egypt and egyptology provides a much needed resource for students and scholars of ancient egypt egyptology and disability in the ancient world it is also suitable for researchers in disability studies practitioners in broader ancient world studies and museum and heritage professionals chapter 1 of this book is freely available as a downloadable open access pdf at taylorfrancis com under a creative commons attribution non commercial no derivatives 4 0 license

the global burden of geriatric hip fractures is enormous from both the patient s and physician s perspective the injury is complex a hip fracture often changes a patient s life and or the life of the patient s family permanently from the physician s perspective care of geriatric hip fracture patients requires a multidisciplinary team which is led by the surgeon and which includes internists and other subspecialists within internal medicine anesthesiologists nurses operating room technicians social workers physical therapists and rehabilitation center coordinators and staff nowhere in the orthopedic literature is there a text that guides care for these complex patients from injury through recovery this text is the first to do so by organizing and synthesizing a large body of literature its main themes include pre operative operative and post operative care of the patient who sustains a geriatric hip fracture its main objective is to organize the current body of literature into a cohesive whole so that the busy orthopedic surgeon does not have to undertake a literature search each time he or she wants an answer to the myriad questions that characterize a patient s injury treatment and recovery course with regard to pedagogy because orthopedic surgeons in training will utilize this book and because the case study is the central pedagogical tool in the field of orthopedic surgery this book includes case

studies within each chapter with the author's preferred treatment and decision making rationale for each case selected video supplements reinforce real world application of knowledge practicing orthopedic surgeons as well as orthopedic residents and fellows in training will find geriatric hip fractures a practical approach a highly useful and informative resource

preventable medical errors the role of different sciences in medical education and practice addresses the issues of staying up to date with evolving medical practices by providing practical examples linked to real world patient safety concerns and illustrating theoretical discussions with clear clinical practice scenarios the book is divided into two sections part 1 how did it come to this and part 2 where does it go from here which guide the reader through how we got here historically and how we can navigate our way out using the tools the author presents thus paving the way bridging a gap between theory and practice while emphasizing the importance of patient safety written for all medical professionals at the forefront of postmodern and scientific medical advancements to ultimately improve clinical outcomes and reduce preventable medical errors provides the reader information to provide medical care that substantially reduces the risk for preventable medical error and consequent patient harm presents a new set of tools more realistic of human biology extending sample based clinical research to patient centric rather than sample centric outcomes allows the reader to create learning tools and situations resulting in more robust medical decision making by physicians and clinicians

integrating scale in remote sensing and gis serves as the most comprehensive documentation of the scientific and methodological advances that have taken place in integrating scale and remote sensing data this work addresses the invariants of scale the ability to change scale measures of the impact of scale scale as a parameter in process models and the implementation of multiscale approaches as methods and techniques for integrating multiple kinds of remote sensing data collected at varying spatial temporal and radiometric scales researchers instructors and students alike will benefit from a guide that has been pragmatically divided into four thematic groups scale issues and multiple scaling physical scale as applied to natural resources urban scale and human health social scale teeming with insights that elucidate the significance of scale as a foundation for geographic analysis this book is a vital resource to those seriously involved in the field of giscience
