this is a detailed consideration of the history of racing in british culture and society and an exploration of the cultural world of racing during the inter war years the supposedly respectable middle classes and gave some working class groups hope and consolation during economically difficult times regular attendance and increased spending on betting were found across class and generation and women too were keen participants

enjoyed by the royal family and controlled by the jockey club and national hunt committee racing's visible emphasis on rank and status helped defend hierarchy and gentlemanly amateurism and provided support for more conservative British attitudes the mass media provided a cumulative cultural validation of racing helping define national and regional identity and encouraging the affluent consumption of sporting experience and frank enjoyment of betting exploration of the internal culture of racing itself the racecourse and course life trainers and jockeys owners and breeders be of value for undergraduate courses on the history of modern British society sport and cultural studies and should be welcomed by racing enthusiasts everywhere

the author's aim is to provide in this book the latest information on winning at one of America's most popular spectator sports he covers the main methods of winning by using such concepts as pace speed trip and bias handicapping as well as offering his own new method the book is intended for both beginners and experienced gamblers

dutching horses for a living horse racing betting systems i never really took to dutching until 5 years ago and i had dabbled with it but got burnt with 33/1 shots winning the race and i had not dutched that selection i think most punters have hit this problem along the way and the pain it gives you in my early years of dutching i would dutch the top 5 or 6 in the betting on betfair as approximately 80 winners come from these top 6 yeah right how wrong was i not to mention the high book value with this approach such as 85 book value or more so virtually no profit for a high risk one losing race would wipe out all of your profit for that day's horse racing and this is what really frustrated me i started modelling UK horse races looking for the best dutching opportunities and started testing this with real money small stakes to begin with of 10 i always think you learn quicker when you use real money the losses seem to strike home more and they hurt once i had identified the types of horse race and horses to dutch i set about designing and implementing a UK horse racing dutching system that would be profitable and more importantly easy to use by punters this book outlines this UK horse racing dutching system and i hope you enjoy using this in the future this dutching system is very simple indeed and you might be wondering why i designed the dutching system this way i have modelled many horse races over the years with complex race and horse selections and i have found that a simple approach to dutching works well in the book i present tips that will support this dutching system to allow you to avoid certain types of horse races and to maximise your profits now these tips do not need to be followed as the dutching system will work just as well without these tips but it is up to you how far you want to take your dutching and more importantly how much money you want to make in a year a word of caution i do not intend to discuss what dutching is and its origins as there are 1000's of articles on the internet for your perusal i did not want the book to regurgitate this and waste your reading time if you are unfamiliar with dutching just put in the keyword phrase dutching horses into the google search bar and you will be presented with a great deal of reading material there also many free dutching calculators available on the internet i have put a few links in this book most betting software have inbuilt dutching calculators i will discuss this type of software later in the book
