Polyphenols in prevention and treatment of human disease, second edition, authoritatively covers evidence of the powerful health benefits of polyphenols touching on cardiovascular disease, cancer, obesity, diabetes, and osteoporosis. This collection represents the contributions of an international group of experts in polyphenol research who share their expertise in endocrinology, public health, cardiology, pharmacology, agriculture, and veterinary science. Researchers from diverse backgrounds will gain insight into how clinical observations and practices can feed back into the research cycle, thus allowing them to develop more targeted insights into the mechanisms of disease. This reference fills a void in research where nutritionists and alternative therapies may be applicable. It describes polyphenol modulation of blood flow and oxygenation as a potential mechanism of protection against vascular atherosclerosis, describes how polyphenols and antioxidants frequently change immune defenses, and focuses on the most important areas of research and provides insights into their relationships and translational opportunities.
