early modern naples has been characterized as a marginal wild and exotic place on the fringes of the european world and as such an appropriate target of attempts by catholic missionaries and others to civilize the city historiographically bypassed in favour of venice florence and rome naples is frequently seen as emblematic of the cultural and political decline in the italian

peninsula and as epitomizing the problems of southern Italy yet as this volume makes plain such views blind us to some of its most extraordinary qualities and limit our understanding not only of one of the world's great capital cities but also of the wider social cultural and political dynamics of early modern Europe as the centre of Spanish colonial power within Europe during the vicerealty and with a population second only to Paris in early modern Europe Naples is a city that deserves serious study further as a Habsburg dominion it offers vital points of comparison with non-European sites which were subject to European colonialism while European colonization outside Europe has received intense scholarly attention its cultural impact and representation within Europe remain under explored too much has been taken for granted too few questions have been posed in the sphere of the visual arts investigation reveals that Neapolitan urbanism architecture painting and sculpture were of the highest quality during this period while differing significantly from those of other Italian cities for long ignored or treated as the subaltern sister of Rome this urban treasure house is only now receiving the attention from scholars that it has so long deserved this volume addresses the central paradoxes operating in early modern Italian scholarship it seeks to illuminate both the historiographical pressures that have marginalized Naples and to showcase important new developments in Neapolitan cultural history and art history those developments showcased here include both theoretical or methodological innovation and new empirical approaches thus this volume illuminates new models of cultural history designed to ask new questions of Naples and tell new stories that have implications beyond the kingdom of Naples for the study of early modern Italy and indeed early modern Europe

poetry and identity in quattrocento Naples approaches poems as acts of cultural identity and investigates how a group of authors used poetry to develop a poetic style while also displaying their position toward the culture of others starting from an analysis of Giovanni Pontano's *Parthenopeus* and *De amore coniugali* followed by a discussion of Jacopo Sannazaro's *Arcadia* Matteo Soranzo links the genesis and themes of these texts to the social political and intellectual vicissitudes of Naples under the domination of Kings Alfonso and Ferrante delving further into Pontano's literary and astrological production Soranzo illustrates the consolidation and eventual dispersion of this author's legacy by looking at the symbolic value attached to his masterpiece *Urania* and at the genesis of Sannazaro's *De partu virginis* poetic works written in neo Latin and the vernacular during the Aragonese domination in this way are examined not only as literary texts but also as the building blocks of their authors' careers

the operatic culture of late eighteenth century Naples represents the fullest expression of a matrix of creators practitioners theorists patrons and entrepreneurs linking aristocratic public and religious spheres of contemporary society the considerable resonance of Neapolitan opera in Europe was verified early in the eighteenth century not only through voluminous reports offered by locals and visitors in gazettes newspapers correspondence or diaries but also and

more importantly through the rich and tangible artistic patrimony produced for local audiences and then exported to the Italian peninsula and abroad Naples was not simply a city of entertainment but rather a cultural epicenter and paradigm producing highly innovative and successful genres of stage drama reflecting every facet of contemporary society. Anthony R. DelDonna provides a rich study of operatic culture from 1775–1800. The book demonstrates how contemporary stage traditions stimulated by the Enlightenment engaged with and responded to the changing social, political, and artistic contexts of the late eighteenth century in Naples. It focuses on select yet representative compositions from different genres of opera that illuminate the diverse contemporary cultural forces shaping these works and underlining the continued innovation and European recognition of operatic culture in Naples. It also defines how the cultural milieu of Naples—aristocratic and sacred, private and public—exercises a profound yet idiosyncratic influence on the repertory studied, the creation of which could not have occurred elsewhere on the continent.

*Amino Acids, Peptides, and Proteins* comprises a comprehensive and critical review of significant developments at the biology and chemistry interface, compiled by leading researchers in their subject. This volume incorporates current trends and emerging areas in topics ranging from synthetic polypeptide materials and conjugates to membrane proteins and bioactive peptides implicated in various diseases and exploited for drug design. Appealing broadly to researchers in academia and industry, it will be of great benefit to any researcher wanting a succinct reference on developments in this area now and looking to the future.

*Breast MRI: State of the Art and Future Directions* provides a comprehensive overview of the current applications of breast MRI, including abbreviated MRI as well as presenting technical recommendations, practical implementation, and associated challenges in clinical routine. In addition, the book introduces novel MRI techniques, multimodality imaging, and advanced image processing coupled with AI, reviewing their potential for improving and future clinical implementation. This book is a complete reference on state-of-the-art breast MRI methods suitable for MRI researchers, radiographers, and clinicians. Breast cancer is one of the leading causes of death among women, with early detection being the key to improved prognosis and survival. Magnetic resonance imaging (MRI) of the breast is undisputedly the most sensitive imaging method to detect cancer with a higher detection rate than mammography. Digital breast tomosynthesis and ultrasound span the whole spectrum of breast MRI, including basic imaging techniques, indications, interpretation, and the latest cutting-edge techniques. Reviews of multiparametric MRI and abbreviated protocols providing an outlook on the future of this technique, discusses the predictive and prognostic value of MRI as well as the evolving field of radiomics, genomics, and AI.

*Italy and the East Roman World in the Medieval Mediterranean* addresses the understudied topic

of the italian peninsula s relationship to the continuation of the roman empire in the east across the early and central middle ages the east roman world commonly known by the ahistorical term byzantium is generally imagined as an eastern mediterranean empire with italy part of the medieval west across 18 individually authored chapters an introduction and conclusion this volume makes a different case for an east roman world of which italy forms a crucial part and an italian peninsula which is inextricably connected to and indeed includes regions ruled from constantinople celebrating a scholar whose work has led this field over several decades thomas s brown the chapters focus on the general themes of empire cities and elites and explore these from the angles of sources and historiography archaeology social political and economic history and more besides with contributions from established and early career scholars elucidating particular issues of scholarship as well as general historical developments the volume provides both immediate contributions and opens space for a new generation of readers and scholars to a growing field
