covering the whole of the nineteenth century wanted a nation reveals how haiti remained a focus of attention for white as well as black americans before during and even after the civil war before the civil war claire bourhis mariotti argues the black republic was considered by free black americans as a place where full citizenship was at hand haiti was essentially viewed and concretely experienced as a refuge during moments when free black americans lost hope of obtaining rights in the united states haiti is also at the heart of this book as haitian leaders supported the american emigration to haiti in the 1820s and early 1860s opposed the american geostrategic and diplomatic diktats in the 1870s and 1880s and finally offered an international platform to frederick douglass at the 1893 columbian world s fair thus helping black people who faced discrimination at home to fight first against slavery and the slave trade and then for equal rights by spanning the entire nineteenth century wanted a nation presents a complex panorama of the emergence of african american identity and argues that haiti should be considered as an essential prism to understand how african americans forged their identity in the nineteenth century drawing on a variety of sources wanted a nation goes far beyond the usual framework of national american history and contributes to the writing of an atlantic and global history of the struggle for equal rights

covering both organic materials where recent advances in the understanding of device physics is driving progress and the newly emerging field of mixed halide perovskites which are challenging the efficiencies of conventional thin film pv cells this book provides a balanced

overview of the experimental and theoretical aspects of these two classes of solar cell the book explores both the experimental and theoretical aspects of these solar cell classes emphasis is placed on understanding the fundamental physics of the devices the book also discusses modelling over many length scales from nano to macro the first book to cover perovskites this is an important reference for industrialists and researchers working in energy technologies and materials

demonstrating the interdisciplinary nature of modern glycosciences this volume covers research in the fields of polysaccharides and small carbohydrates from the synthetic and structural viewpoints with applications ranging from biology to the bioeconomy key aspects of the synthesis and properties of imino disaccharides and regioselective glycosylation reactions are reviewed glycosyltransferase inhibitors are shown to be potential future therapeutic agents protein carbohydrate interactions in plant cell wall biodegradation are targeted by the use of glycan microarrays biological properties of polysaccharidic microbial surface antigens are discussed with respect to their intimate structure and contributions on carbohydrate based hydrogelators green blue sugar based surfactants and carbohydrate based green solvents illustrate the modern design of tomorrow s chemicals with the increase in volume velocity and variety of information researchers can find it difficult to keep up to date with the literature in their field and this book remains a valuable addition to any researcher s library

in both countries france and germany there is great pressure to change and adapt towards new forms of urbanity and to conceive new strategic approaches with limited public finance and a need for economic efficiency not all types of urban areas are equally affected by these issues the book aims to do justice to this situation considering in both cases the context of the national urban systems as it proved

impossible to address all the topics relevant to the spatial development of urban and rural areas the authors decided to concentrate on a number of important topical themes which are undoubtedly relevant in both countries albeit in different ways and which could be significant for a comparison the focus is thus on issues related to metropolises small and medium sized towns and particularly current issues of urbanity sustainability smart cities transport and mobility and the role of cross border urban development the structure of the chapters is conceived in these terms besides scientific and theoretical approaches the authors also consider the practical planning perspective and methodological aspects of the topic at hand they mainly address three relevant factors the differences between the two institutional systems the development paths and historical constants and how new challenges are addressed on both sides of the border

catalysis is a central topic in chemical transformation and energy conversion thanks to the spectacular achievements of colloidal chemistry and the synthesis of nanomaterials over the last two decades there have also been significant advances in nanoparticle catalysis catalysis on different metal nanostructures with well defined structures and composition has been extensively studied metal nanocrystals synthesized with colloidal chemistry exhibit different catalytic performances in contrast to metal nanoparticles prepared with impregnation or deposition precipitation additionally theoretical approaches in predicting catalysis performance and understanding catalytic mechanism on these metal nanocatalysts have made significant progress metal nanoparticles for catalysis is a comprehensive text on catalysis on nanoparticles looking at both their synthesis and applications chapter topics include nanoreactor catalysis pd nanoparticles in c c coupling reactions metal salt based gold nanocatalysts theoretical insights into metal nanocatalysts and nanoparticle mediated clock reaction this book bridges the gap between nanomaterials synthesis and characterization and catalysis as such this text will be a valuable resource for

postgraduate students and researchers in these exciting fields

over the past forty years countries in the global north have increasingly restricted their migration policies to reduce the arrival of migrants as part of this development aid has become a central tool in the migration control strategy pursued by european countries and the us with donors international organisations and ngos becoming prominent actors in this book lorena gazzotti shows that migration control is not only exercised through fences and deportation building on extensive research in morocco gazzotti shows that aid marks the rise of a substantially different mode of migration containment one where power works beyond fast violence and its disciplinary potential is augmented precisely by its elusiveness where existing studies on border externalisation have essentialised donors international organisations and ngos with countries of origin and transit as compliant subcontractors and border control as a neat form of intervention this nuanced study unsettles such assumptions to show that bordering happens in everyday mundane fashions far away from the spectacle of border violence this title is also available as open access on cambridge core

Yeah, reviewing a ebook Rennes could be credited with your close contacts listings. This is just one of the solutions for you to be successful. As understood, achievement does not suggest that you have astonishing points. Comprehending as well as concord even

more than additional will pay for each success. neighboring to, the broadcast as skillfully as sharpness of this Rennes can be taken as skillfully as picked to act.

1. How do I know which eBook platform is the best for me? Finding the best

-
- eBook platform depends on your reading preferences and device compatibility. Research different platforms, read user reviews, and explore their features before making a choice.
