have emerged over the last decade this approach interrogates the widespread exploitation of natural resources that forged industrialization from its early emergence in 18th century northern Europe to its contemporary ubiquity environmental impacts and social legacy within our globalized world through a broad international and multi period set of chapters this volume explores the complex origins processes and development of industrialization through both its physical remains and human consequences both the good and the bad it provides a diverse material framework for understanding our modern world from its industrial origins through its future paths in the 21st century

despite ubiquitous powerful technologies such as networked computers global positioning systems and cell phones human failures in decision making and performance continue to have disastrous consequences electronic performance support using digital technology to enhance human ability reminds everyone involved in education training human performance engineering and related fields of the enormous importance of this area ironically the more complex technology becomes the more performance support may be needed and that is why the extraordinary expertise shared in this book is especially valuable the authors emphasize the psychological aspects of performance support the fundamental limitations of human memory perception cognition and psychomotor skills and how they can be reduced through electronic performance support as one of the most important pursuits of this century readers will find the material presented extremely useful because of its generic basis which underlines much of the contemporary use of electronic technology for supporting people who are engaged in problem solving activities at the same time the book gives examples of the application of electronic performance support in a number of specific domains possible future developments for electronic performance support are also discussed the technological challenges we face today both globally and locally are more urgent than most people seem willing to acknowledge and there is no time to waste putting the ideas expressed in this book into action

Britain's rail network is now among the safest in the world but the journey that brought it to that point has been long and eventful early incidents like the felling of William Huskisson MP by Stephenson's Rocket 1830 showed how new ideas could bring new dangers yet from disaster came new safety measures and within fifty years better signalling and braking methods had been made mandatory the twentieth century saw accidents repeatedly lead to action and further advances in rolling stock track design and train protection systems Greg Morse charts these changes through the events that helped to prompt them including the Armagh collision 1889 and the Harrow Wealdstone disaster 1952 he ends with a railway approaching a new golden age in the 1980s yet with the tragedy at Clapham Junction 1988 offering a solemn reminder against complacency

some of the most significant architectural features of british communities the parsonage has provided the central hub for local towns and villages for hundreds of years this is the story of their evolution architecture and changing occupants

an illustrated look at the british rail era those who travelled and those who spotted

from britannia to the blue pullman evening star to inter city greg morse takes us through this turbulent twenty year period on the british rails

britain s towns and cities were famously transformed in the nineteenth century by the coming of the railways turning their fortunes around and giving urban dwellers new opportunities to travel across the country yet the effect on the rural population was arguably far greater whilst some of the initial trunk lines were designed to link major cities the network of smaller cross country and branch lines that followed opened up large tracts of previously remote countryside providing new markets for agricultural produce and ending the isolation of many rural communities and such was the pace of development during the railway mania period that by the end of the nineteenth century there were few areas of country not served by train this book tells the story of these railways from golden age to decline in the wake of nationalization and the beeching report in the mid twentieth century and indeed contemporary efforts to restore and preserve them
