until this volume was compiled the results of the 1920 olympics held in antwerp belgium have been far from complete the antwerp organizing committee typed up a report of the results almost as an afterthought because it was so financially strapped after the games for some events only the medalists are listed with little if any additional information very few copies were ever produced and those few copies were in french the seventh in a series on the early olympics this work fills a gap in the recording of early olympics history by providing complete results for all competitors and all events except for shooting which has only partial information available in virtually all cases a 1920 source has been used in preference to a more modern source of information and all details have been fully researched in contemporary newspapers journals and magazines and checked for accuracy by experts on various sports from all over the world

young people in the west are more likely to encounter religion in videogames than in places of worship like churches mosques or temples lars de wildt interviews developers and players of games such as assassin s creed to find out how and why the pop theology of videogames is so appealing to modern audiences based on extensive fieldwork this book argues that developers of videogames and their players engage in a pop theology through which laymen reconsider traditional questions of religion by playing with them games allow us to play with religious questions and identities in the same way that children play at being a soldier or choose to play house this requires a radical rethinking of religious questions as no longer just questions of belief or disbelief but as truths to be tried on compared and discarded at will
