over the past decade people have learned about oil contamination in the ecuadorian amazon through toxic tours in which a guide brings participants students lawyers environmental activists journalists and foreign tourists to visit

contaminated sites these toxic tours combine personal experience and local knowledge to convince visitors of the immediacy of environmental issues drawing on extensive research and fieldwork toxic takes the reader on a visual toxic tour through the amazon following the story of three fictional participants this graphic novel paints a visceral picture of the waste pits gas flares and precarious lives of people in this region the book challenges the reader to consider what it means to live in a place and historical moment where victims of industrial toxicants are continually required to prove that harm has occurred toxic is a vivid reflection on the role of pollutants in our everyday lives ultimately asking readers to reflect on how we are each implicated in the production consumption and exposure of pollution both in the amazon and at home

discussing the civilizatory crisis and processes of refeudalization this volume brings into dialogue two of the most creative approaches in olaf kaltmeier and edgardo lander to rethink capitalism in the 21st century in part 1 olaf kaltmeier takes issue with the state of social inequality in the region highlighting the concentration of wealth within the upper 1 of society in latin america comparing the current economic situation with the ancient regime the discussion centers around the new phenomena like billionaires as president increased luxury consumption an emerging culture of distinction and the intensification of land and spatial segregation in part 2 lander urgently assesses the current state and political legacy of the pink tide governments in his essay crisis of civilization reviewing the past two decades of the new millennium lander critiques the failure of these governments to provide alternatives to extractivism and economic dependencies finally hans jürgen burchardt connects the arguments through interviews where both authors sum their efforts to open the issues to future dialogue refeudalization in latin america provides an accessible and thought provoking political diagnosis from the global south which departs from the oft idiosyncratic and cyclical debates of the global north to offer new vocabulary for social change it will interest scholars and students of global studies sociology and political science

this textbook provides in depth treatment of all systems associated with wind energy including the aerodynamic and structural aspects of blade design the flow of energy and loads through the wind turbine the electrical components and power electronics including control systems it explains the importance of wind resource assessment techniques site evaluation and ecology and describes the integration of wind farms into the electrical grid the reader will also become familiar with the offshore technology the youngest and most promising aspect of wind energy the completely revised and updated new edition provides new sections on fatigue design analytical models for structural analysis and topology optimization the book is written by experts in research teaching and industry it conveys the importance
