covid 19 was first identified in wuhan city in december 2019 and spread throughout hubei province and other parts of china after causing significant morbidity and mortality in china by february 2020 it had spread to numerous other countries infecting millions of people and causing a large number of deaths across the world the covid 19 pandemic put a burden on almost all areas of the world including healthcare systems education industry travel etc the pandemic revealed the vulnerability of the world's healthcare systems and affected healthcare personnel significantly the virus is able to attack not only the respiratory tract but almost all the organs including the brain impacts on gut biota have also been noticed the virus has caused both morbidity and mortality in humans without any geographical cultural or religious barriers the emergence of new variants due to mutations in the virus has aggravated the problem while the delta variant

brought a second wave and killed a large number of people due to various factors such as lowering of saturated oxygen in blood and other physiological emergencies the omicron variant proved to be less lethal though the pandemic has subsided the emergence of the subvariants ba1 and ba2 and now their hybrids has started to increase the number of cases at exponential levels and has forced new lockdown measures in places such as china as the conditions laid down to combat the pandemic have been relaxed the virus may reach other countries and cause additional countries to resort to lockdown again covid 19 became the focus of the scientific community with the aim of developing new drugs repurposing available drugs to be used against the virus and developing a series of vaccines in a short time the mild effect of omicron might have been due to the extensive vaccination programmes carried out in various countries however there is genuine fear that newly emerging variants may evade the immune system and cause damage to the body this book highlights the impact of covid 19 on science industry and healthcare systems the chapters included in the volume come from dedicated experts belonging to basic sciences biotechnology pharmaceutical sciences and other fields of sciences these include discussions on how the virus evolves and attacks various organs in the body a separate chapter explains the emergence of various strains of virus the preparedness of hospitals and healthcare workers as well as different agencies such as drdo to face the challenges posed by virus is also discussed the way scientists and technologists developed new techniques to detect and control the virus have also been highlighted including a chapter on the development of vaccines to control the pandemic this book is a key resource for students teachers medical personnel administrators and the public as a whole

with the signing of the paris agreement in december 2015 the united nations explained their willingness to limit the ghg emissions and contribute to the measures against the global warming effect in 2019 the european commission proposed the green deal and as a consequence the target to be climate neutral in 2050 in consequence the fossil based energy system has to transform into a climate neutral energy system with renewable and sustainable energy carriers research on and development of alternative fuels and new production processes are ongoing to provide the technical solution political actions are needed to provide the economic framework for the introduction of such alternative fuel solutions the fulfilment of the european co2 reduction targets until 2050 needs realistic technical solutions including backwards compatible approaches for existing vehicle fleets an economic and sustainable development towards climate neutral mobility requires a holistic view based on life cycle assessments for the different mobility approaches including the economic impacts as well as financing options a synergetic discussion of solutions for future fuels and powertrain technologies is needed to develop an economic pathway to a sustainable and affordable mobility of tomorrow the challenging goal for mobility can only be achieved through an international cooperation of universities the automobile industry energy producers the oil industry and the legislative bodies of the member states the international colloquium aims to contribute to the development of a climate neutral mobility by exchanging views on and discussing all aspects connected with the powertrain fuel environment system including the necessary political regulations

réunissant les réflexions de politistes et sociologues français et internationaux parmi les plus reconnus cet ouvrage propose un état des lieux de la discipline

des politiques publiques en s'appuyant sur les travaux fondateurs de pierre muller qui a fortement contribué à sa reconnaissance et à son développement À partir de thèmes fondateurs de la science politique tels que la domination la démocratie la place des acteurs dans les processus politiques ou le gouvernement des sociétés complexes les auteur e s posent la question d'une spécificité française dans l'analyse de l'action publique supposée mais rarement discutée en profondeur cette french touch existe t elle et si oui en quoi consiste t elle cet ouvrage offre une vision panoramique des développements méthodologiques conceptuels et pratiques de ce champ de recherche particulièrement dynamique en conclusion pierre muller livre des éléments d'analyse inédits sur la question du changement de l'action publique ainsi que de nouvelles pistes de recherche

the jpi climate axis project unpacking climate impact chains a new generation of action and user oriented climate change risk assessments unchain is approaching its end date 31 12 2022 and the project is looking for an opportunity to collect its remaining scientific publications into a research topic the overall objective of unchain is to improve climate change risk assessment frameworks aimed at informed decision making and climate change adaptation action through six methodological innovations to also cover the possible need for long term and large scale efforts of societal transformation to refine a structured method of co production of knowledge and integrate this into impact modelling to develop and test an applicable framework for analyzing how societal change can affect local climate change vulnerabilities to develop and test a standardized analytical framework for addressing uncertainties involved in local decision making on climate change adaptation to integrate the trans national impacts of climate change and to link mitigation and adaptation in climate risk and vulnerability assessments
